1-2-4 Severability Clause

1-2-1 REPEAL OF GENERAL ORDINANCES: All general ordinances of the County passed prior to the adoption of this code are hereby repealed, except such as are referred to herein as being still in force or are by necessary implication herein reserved from repeal (subject to the saving clauses contained in the following sections), from which are excluded the following ordinance which are not hereby repealed: tax levy ordinances; appropriation ordinances; ordinances relating boundaries; franchise ordinances and other ordinances granting special rights to persons or corporations; contract ordinances and ordinances authorizing the execution of a contract or the issuance of warrants; salary ordinances; ordinances establishing, naming or vacating streets, alleys or other public places; improvement ordinances; bond ordinances; ordinances relating to elections; ordinances relating to the transfer or acceptance of real estate by or from the County; and all special ordinances.

punishment so incurred, or any right accrued or claim arising under
the former ordinance, or in any way whatever to affect any such
offence or act so committed or so done, or any penalty, forfeiture or
punishment so incurred or any right accrued or claim arising before
the new ordinance takes effect, save only that the proceedings

WHEREAS, the Illinois General Assembly has enacted the State Officials and Employees Ethics Act (hereafter “The Act”) (PA 93-615, effective November 19, 2003; as amended by PA 93-617, effective December 9, 2003), which is a comprehensive revision of State statutes regulating ethical conduct, political activities and the solicitation and acceptance of gifts by State officials and employees; and

WHEREAS, The Act requires all units of local government and school districts, within six (6) months after the effective date of PA 93-615, to adopt Ordinances or Resolutions regulating the political activities of, and the solicitation and acceptance of gifts by, the officers and employees of such units “in a manner no less restrictive” than the provisions of The Act; and

WHEREAS, it is the clear intention of The Act to require units of local governments and school districts to implement regulations that are at least as restrictive as those contained in The Act, and to impose penalties for violations of those regulations that are equivalent to those imposed by The Act, notwithstanding that such penalties may exceed the general authority granted to units of local government to penalize Ordinance violations; and

WHEREAS, it is the clear intention of The Act to provide units of local government with all authority necessary to implement its requirements on the local level regardless of any general limitations on the power to define and punish Ordinance violations that might otherwise be applicable; and

6. To permit the alteration or enlargement of an existing building or use located on premises in a district which prohibits that use of land or building, or the height and area of buildings existing at the time of the adoption of this Resolution where such alteration or enlargement is a necessary incident to the use of the structure existing at the time of the adoption, amendment, or change of this Resolution; and

A lot, lots, or parcel of land shall not qualify for a zoning amendment unless it possesses at least two hundred (200) feet of frontage or contains at least twenty-five thousand (25,000) square feet of area, or adjoins a lot, lots, or parcel of land which bears the same zoning district classification as the proposed zoning amendment.

G. Action by the County Board

1. The County Board shall not act upon a proposed amendment to this Resolution until they have received written report and recommendation from the Zoning Board of Appeals on the proposed amendment,
2. The County Board may grant or deny an application for an amendment provided, however, that in case of a written protest against any proposed amendment, and signed and acknowledged by the owners of twenty (20) percent of the frontage proposed to be altered, or by the owner of twenty (20) percent of the frontage immediately adjoining or across an alley therefrom, or by the owner of twenty (20) percent of the frontage directly opposite the frontage proposed to be altered, or in cases where the land affected lies within one and one-half (1 1/2) miles of the limits of a zoned municipality, or in the case of a proposed test amendment to the zoning ordinance, by resolution of the corporate authorities of the zoned municipality with limits nearest adjacent, filed with the County Clerk, such amendment shall not be passed except by the favorable vote of three-fourths (3/4) of all the members of the County Board. In such cases a copy of the written protest shall be served by the protestor or protestors on the applicant for the proposed amendment and a copy upon the applicant's attorney, if any, by certified mail at the address of such applicant and attorney shown in the application for the proposed amendment.

H. **Effect of Denial of an Amendment.** No application for an amendment that has been denied wholly or in part by the County Board shall be resubmitted for a period of one (1) year from the date of said denial except on the grounds of new evidence or proof of change of conditions found to be valid by the Administrative Officer.

3-2-6.3 **SPECIAL USES**

A. **Authority.** The development and administration of this Resolution is based upon the division of the County into zoning districts, within which districts the use of land and buildings and the bulk and location of buildings and structures in relation to the land are substantially uniform. It is recognized, however, that there are certain uses that may have unique, special or unusual impact upon the use or enjoyment of neighboring property and planned developments and cannot be properly classified in any particular district or districts, without consideration in each individual case. A use may be permitted in one or more zoning districts and a Special Use in one or more other zoning districts. Such
cases are classified in this Resolution as “Special Uses” and fall into two (2) categories:

1. Uses publicly operated or traditionally affected with a public interest; and

2. Uses entirely private in character but of such an unusual nature that their operation may give rise to unique problems with respect to their impact upon neighboring property or public facilities.

B. Initiation of Special Use. Any person having a freehold interest in land, a possessory interest entitled to exclusive possession, or a contractual interest which may become a freehold interest of an exclusive possessory character, any of which is specifically enforceable, may file an application to use such land for one or more of the Special Uses provided for in this Resolution in the zoning district in which the land is located.

C. Application for Special Use. An application for a Special Use shall be filed with the Administrative Officer on a form as he shall prescribe. The application required by the Administrative Officer shall, at a minimum, include the substance of the applicant’s proposal. The applicant shall also disclose in writing the applicant’s interest in real estate in any of the property adjoining and adjacent to the subject site property lot lines. The applicant’s hearing presentation of the Special Use application shall be restricted to the general substance of the application as initially filed with the Administrative Officer. This restriction is not intended to limit the applicant’s responses during any hearing nor is it intended to restrict the presentation of project details or other information within the general substance of the application. The filing of the application and the notices required in Section 6.3.E shall be construed as jurisdictional requirements. The application shall be accompanied by such plans and/or data prescribed by the Zoning Board of Appeals and shall include a statement in writing by the applicant and adequate evidence showing that the proposed Special Use will conform to the standards set forth in Section 6.3.F hereinafter.

Such application shall be forwarded from the Administrative Officer to the Zoning Board of Appeals with a request for a public hearing and
report relative thereto. All documents filed by the applicant or other interested persons shall be date stamped or otherwise marked by the Administrative Officer, and the Administrative Officer shall keep a separate file of the Special Use application, with a docket sheet adequately describing each document filed by the applicant or otherwise submitted by objectors and other interested persons.

D. Hearing an Application. Upon receipt in proper form of the application and statement referred to in Section 6.3.C above, the Zoning Board of Appeals shall hold at least one public hearing on the proposed Special Use. The hearing shall be preserved in such manner as the Zoning Board of Appeals shall, by rule, prescribe from time to time.

All testimony by witnesses in any hearing shall be given under oath. The oath shall be administered to each witness and shall not be administered to a group of persons. Each witness shall be duly identified on the record at the time of taking the oath.

The Zoning Board of Appeals shall hold at least one hearing on the application and may hold as many hearings as necessary when the nature of the application and the nature of any proposed evidence may require additional hearings. All hearings shall be conducted to assure fundamental fairness and a full opportunity by the applicant, objectors, and a reasonable number of other interested citizens to participate fully in the hearing process, including but not limited to the right to present witnesses on the applicable standards in Section 6.3.F and the opportunity to question any witness of the other party. The chairperson shall have the right to restrict repetitive testimony. Any party appearing before the Zoning Board of Appeals may exercise the right to transcribe or record the proceedings at the expense of the party. The Zoning Board of Appeals shall accommodate any request to transcribe or record the proceedings.

The Zoning Board of Appeals reserves the right to control location of recording devices to insure the orderly nature of the proceedings. The party exercising their right to transcribe or record the proceedings shall have recording equipment and/or person(s) who will transcribe the proceedings available at the commencement of the hearing. The failure
of said party to provide recording equipment and/or person to transcribe
said hearing shall not be just cause to request continuance.

E. **Notice of Hearing.** Notice of time and place of such hearing shall be
published not less than fifteen (15) nor more than thirty (30) days
preceding said hearing and at least once in one or more newspapers of
general circulation in the County of Rock Island.

The Administrative Officer shall also cause service of written notice not
less than fifteen (15) nor more than thirty (30) days prior to the hearing
in person or by mail, upon the Township Supervisor and the County
Board member representing the township or district of the subject site
and to all property owners whose property adjoins the subject site
property lot lines, and to any other person or entities required by law to
be notified and to all persons or entities entitled to object to such special
uses.

In the event that property adjoining the subject site is owned by the
applicant, notice will be sent to the owners of property which adjoin such
other property owned by the applicant, if such property is not more than
1500 feet from the subject site property lot lines. The owners shall be
identified as those persons or entities which appear upon the authentic
tax records of Rock Island County in the Rock Island County Supervisor
of Assessment Office as of January 1st of the calendar year of the filing
of the Special Use request.

The calculations of the distance and the determination of adjoining and
adjacent property owners shall exclude all public roads, streets, alleys,
and other public ways.

In computing distances, the Administrative Officer is entitled to rely on
the property records as such exist as of the date the applications is filed.
The written notice shall contain the date, time and place of the hearing,
the name and address of the applicant, location of the proposed site, the
nature of the Special Use and a statement that persons have a right to
participate in the Special Use hearing. The notice to the Township
Supervisor and County Board Member and adjacent and adjoining
property owners shall include the above referenced information.
F. **Standards.** No Special Use shall be granted by the County Board unless such Board shall find:

1. That the establishment, maintenance, or operation of the Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare;

2. That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purpose already permitted, nor substantially diminish and impair property values within the neighborhood, and will be located and operated to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property. The applicant need not demonstrate complete compatibility, but the applicant shall demonstrate reasonable efforts to minimize incompatibility;

3. That the establishment of the Special Use will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the districts;

4. That adequate utilities, access roads, drainage and/or other necessary facilities have been or are being provided;

5. That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets;

6. That the plan of operations for the Special Use is designed to minimize the danger to the surrounding area from fire or other operational accidents; and

7. That the Special Use shall, in all other respects, conform to the applicable regulations of the district in which it is located, except as such regulations may, in each instance, be modified by the County Board.

After a Special Use Permit has been granted, the Administrative
Officer or any person whose property is being, or may be adversely affected by operation of the Special Use, may file a petition in writing with the Zoning Board of Appeals requesting that the Special Use permit be modified or revoked. The petitioner shall specifically allege the violation of the conditions under which the permit was granted or facts which would justify modification or revocation of the Special Use Permit.

If the petition is filed by the Administrative Officer, the matter shall be set for hearing. The provision of Section 6.3.D and 6.3.E pertaining to hearings and notices shall be applicable. The hearing shall be held within sixty (60) days of the filing of the petition. The petitioner and the holder of the Special Use Permit must be notified. Copies of the petition shall be sent to the holder of the Special Use Permit along with the notice.

In the event the petition is filed by persons other than the Administrative Officer, the petition shall be first referred to the Administrative Officer for investigation. Within forty-five (45) days after the petition has been filed, the Administrative Officer shall report his findings and conclusions to the Zoning Board of Appeals. Within fifteen (15) days after receiving the Administrative Officer’s report, the Zoning Board of Appeals shall set the matter for hearing within sixty (60) days or shall recommend to the County Board to dismiss the petition. If the petition is dismissed, the Zoning Board of Appeals shall state its reasons for dismissal and notify the petitioners and the holder of the Special Use Permit accordingly. In the event a hearing is scheduled, Section 6.3.D and 6.3.E pertaining to hearing and notice shall be applicable. The petitioner and the holder of the Special Use Permit shall be notified. The holder of the Special Use Permit shall be sent a copy of the petition with the notice.

Prior to filing a petition with the Zoning Board of Appeals, or reporting findings and conclusions to the Zoning Board of Appeals, pursuant to the Section, the Administrative Officer shall give the holder of the Special Use Permit a reasonable period of time to correct violations. The other time requirements of this
Section shall not be stayed during the period of time the holder of the Special Use Permit is given to correct violations.

The County Board shall be guided but not controlled, by the findings and conclusions of the Administrative Officer. After a hearing, the Zoning Board of Appeals may recommend to the County Board to deny the prayer of the petition, or if the evidence so warrants, recommend to the County Board to revoke the Special Use Permit or modify the conditions of the permit. The burden of proof shall be on the petitioner.

The hearing shall be governed under the general standards as described in Section 3-2-6.3.D. Any decision of the County Board under this section shall be final.

8. That Special Use Permit applications for Rural Residential Building Lots shall be deemed to meet the requirements of Section 3-2-6.3.f provided the board finds:

a. That the Parcel contains 43,560 square feet (1 Acre)

b. That the property shall have 165 feet of frontage

c. Access to the property (the driveway) shall be directly onto an asphalt or concrete roadway maintained by either the Illinois Dept. of transportation or the Rock Island County Highway Dept. (no township roads, private roads, gravel or chip and seal)

d. Efforts shall be taken to reduce the amount of farm ground removed from production while realizing the minimum lot size.

e. The parcel shall be adequate for 2 (two) complete septic systems (1 now, 1 for replacement upon failure of the original), with written confirmation from the Rock Island County Health Dept.

f. Signed acknowledgment of the “Rock Island County Rural Living Contract”.

Code of Ordinances Page 166
g. Land Evaluation Site Assessment score of less than 225.

h. The property shall have no buildable area in a floodplain as delineated on the Flood Insurance Rate Maps (FIRM) for Rock Island County, as adopted.

i. Where determined to be necessary by the Zoning Administrator, a 60 ft. wide area shall be left between parcels for future road access to properties lying behind the subject property, with the intent to maintain the possibility of long term development. Appeals of the Administrator’s decision shall be heard by the Zoning Board of Appeals, said decision being final.

j. The property shall be in an area where the proposed lot size does not meet the requirements of the current Rock Island County Land Use Map.

G. Conditions and Guarantees. Prior to the granting of any Special Use, the Zoning Board of Appeals shall recommend to the County Board such conditions and restrictions upon the establishments, location, construction, maintenance and operation for the Special Use as it is deemed necessary for the protection of the public interest and to secure compliance with the standards specified in Section 6.3.F above. In all cases in which Special Uses are granted, the County Board shall require such evidence and guarantees as it may deem necessary as proof that the conditions stipulated in connection therewith are being and will be complied with.

H. Effect of Denial of a Special Use. No application for a Special Use that has been denied wholly or in part by the County Board shall be resubmitted for a period of one (1) year from the date of said order of denial, except on the grounds of new evidence or proof of change of conditions found to be valid by the Administrative Officer.

I. Revocation. In any case, where a Special Use has not been established within one (1) year after the date of granting thereof, then without further action by the County Board, the Special Use or
authorization shall be null and void, unless otherwise specified by the County Board.

1. The provisions of Section 3-2-6.3.F.7 of this Resolution, pertaining to modification or revocation of special use permits, shall be applicable to Special Use permits or Special Use permits previously issued by the Zoning Board of Appeals under prior versions of this Resolution.

J. **Action by the County Board.** The County Board shall not act upon a proposed Special Use until they have received written report and recommendation from the Zoning Board of Appeals on the proposed Special Use.

1. The concurring vote of four (3) members of a Board consisting of five (5) members is necessary to recommend to the County Board to approve the petition.

2. The County Board may grant or deny an application for a Special Use, provided, however, that in case of a written protest against any proposed Special Use, and signed and acknowledged by the owners of twenty (20) percent of the frontage to be altered, or by the owner of twenty (20) percent of the frontage immediately adjoining or across an alley therewith, or by the owner of twenty (20) percent of the frontage directly opposite frontage proposed to be altered, or in the cases where the land affected lies within 1½ miles of the limits of a zoned municipality, by resolution of the corporate authorities of the zoned municipality with limits nearest adjacent, filed with the County Clerk, such Special Use shall not be passed except by the favorable vote of 2/3 of all of the members of the County Board. In such cases, a copy of the written protest shall be served by the protestor or protestors on the applicant for the proposed Special Use and a copy upon the applicant’s attorney, if any, by certified mail at the address of such applicant and attorney shown in the application for the proposed Special Use.

GENERAL AGRICULTURAL DISTRICT – “AG-2”

ARTICLE XI - “AG-2” GENERAL AGRICULTURAL DISTRICT

3-2-11.0 GENERAL DESCRIPTION

The AG-2 General Agricultural District is established to protect and maintain the agricultural economy and the open space and natural features of rural areas of the County in order to protect lands for continued farming, allow non-farm residential development on a limited basis, and minimize conflicts between agricultural and non-agricultural areas.

The AG-2 District is also established to protect those agricultural lands which, due to their location, soils, and use for agricultural activities, warrant protection from indiscriminate development. However, their proximity to existing development, combined with pressures for new development, makes these lands unsuitable for preservation according to the more restrictive regulations of the AG-1 Agricultural Preservation District. The AG-2 District is also intended to protect those agricultural lands that would otherwise be subject to residential subdivision activity which could render these important farmlands useless for farming.

PLANNED UNIT DEVELOPMENT DISTRICT – “PUD”

Section 32 “PUD”– PLANNED UNIT DEVELOPMENT DISTRICT

32.0 PURPOSE

The purpose of the planned unit development (PUD) district is to promote to the extent possible:

A. A maximum choice in the types of environment available to the public by allowing a development that would not be possible under the strict application of the other sections of this ordinance.

B. A Permanent preservation of common open space and recreation areas and facilities.

C. A pattern of development to preserve natural vegetation, topographic, and geologic features.
D. A creative approach to the use of land and related physical facilities that results in better development, design and the construction of aesthetic amenities.

E. An efficient use of the land resulting in more economic networks of utilities, streets, and other facilities.

F. A land use which promotes the public health, safety, comfort, morals, and welfare.

The PUD district is intended to provide for a development incorporating a single type or a variety of related uses which are planned and developed as a unit but departs from the normal standards and requirements of other sections of this ordinance.

The planned unit development may provide amenities not otherwise required by law and may establish facilities and open space greater than the minimums required by law. Such development may consist of conventionally subdivided lots or provide for development by a land use and zoning plan which establishes the location and extent of the features of the planned unit development in keeping with the purpose of the plan.

The foregoing purposes and principals shall not be interpreted to permit the reduction of standards set forth in this section.

3-2-32.1 PROCEDURE

The owner, owners, or bona fide buyer of any tract of land may petition the Zoning Board of Appeals for a change to the PUD zoning district in accordance with Article 6. A planned unit development shall be authorized in accordance with the following procedures:

A. Application procedure.

1. The application for a rezoning to the PUD zoning district shall be accompanied by an application plan meeting the requirements of 32.2.a. of this section and show evidence that the proposed development will conform to the official County plan and to the purpose of the PUD district set forth in 32.0 of this section. The Zoning Board of Appeals shall grant or deny said application pursuant to the provisions contained in Article 6. Approval of the PUD zoning district shall constitute an expression of approval by the Zoning Board of Appeals of the application plan as a guide to the preparation of the
preliminary PUD plan. The applications shall be accompanied by a filing fee in an amount equal to that prescribed by Article 6.

2. To reduce the number of steps involved in the approval of a planned unit development, a preliminary PUD plan meeting the requirements of 32.1.b. and 32.2.b. of this section may be submitted in lieu of an application plan required in (a) above. This type of application shall be accompanied by a filing fee in an amount equal of one hundred dollars ($100.00) plus an amount equal to that prescribed by 1.2(a)(2) of this section.

B. Approval of the preliminary plan.

1. a. Supporting data in accordance with 32.2.b. this section.

b. Copies of the preliminary PUD plan and supporting data shall be submitted to the Administrative Officer for certification as to conformity with these regulations, recommendations, and suggestions regarding the overall design, if any.

c. Copies of the preliminary PUD plan shall be submitted to the Zoning Board of Appeals who shall hold public hearings on the application for a preliminary PUD plan giving notice of the times and places as required by state law by publishing a notice thereof at least once in a publication having general circulation within the county. Following the public hearings, a recommendation of approval or denial of the preliminary PUD plan shall be made by the Zoning Board of Appeals to the County Board. If needed, the Zoning Board of Appeals shall review the preliminary PUD plan and grant or deny any exceptions or variances needed.

2. Findings: The Zoning Board of Appeals shall set forth the reasons for the recommendation, and said recommendation shall set forth how the proposal would be in the public interest, including but not limited to findings of facts on the following:

a. In what respects the proposed plan is consistent with the stated purpose of the planned unit development requirements.
b. The extent to which the proposed plan meets the requirements and standards of the planned unit development district.

c. The extent to which the proposed plan departs from the zoning and subdivision regulations otherwise applicable to the subject property, including but not limited to the density, dimension, area, bulk and use, and the reasons why such departures are deemed to be in the public interest.

d. The physical design of the proposed plan and the manner in which said design makes adequate provision for public services, provides adequate control over vehicular traffic, provides for and protects designated common open space, and furthers the amenities of light, air, recreation, and visual enjoyment.

e. The relationship and compatibility of the proposed plan to the adjacent properties and neighborhood.

f. The desirability of the proposed plan to physical development, tax base, and economic well-being of the entire community.

g. The conformity with the intent and spirit of the comprehensive plan.

h. Specific points noted on the plan that have impact on its design, function, and visibility in the community.

3. Following receipt of the recommendation by the Zoning Board of Appeals and approval by the County Board, the Zoning Board of Appeals shall, within sixty (60) days, recommend approval, modification within limits of a minor change, or disapproval of the planned unit development plan. As a condition to the approval of the preliminary PUD plan, the Zoning Board of Appeals shall set forth findings of fact in accord with 32.1 of this section on which they base their approval and describing how the proposal meets the standards of 32.3 of this section.

4. All conditions, documents, and plans required by the Zoning Board of Appeals must be delineated on the plat or agreed to in
writing prior to Zoning Board of Appeals approval.

5. The Zoning Board of Appeals may require such special conditions as they may deem necessary to insure conformance with the intent of all comprehensive plan elements, the stated purpose of the planned development district and established county policies.

6. Approval of a preliminary planned unit development plan shall not constitute approval of the final plan. Rather it shall be deemed an expression of approval to the layout submitted on the preliminary plan as a guide to the preparation of the final plan which will be submitted for approval of the county. The final plan shall be approved as the final land use and zoning plan if it conforms substantially with the preliminary land use and zoning plan.

(Note: The final plan may be considered as a preliminary and final plan and may be submitted for preliminary and final approval, if all of the land is to be developed at one time, and if all requirements hereof are met.)

7. The provisions of Article 6 shall be applicable to the preliminary PUD plan.

C. Approval of final plan. The final planned unit development plan shall be submitted to the Administrative Officer who shall refer same to the Zoning Board of Appeals. The final PUD plan shall conform to the preliminary PUD plan as approved or subject to minor changes, and may be submitted in stages with each stage reflecting the approved preliminary plan; provided, however, that such stage conforms to all requirements of these regulations. The Zoning Board of Appeals may grant an extension in time or the developer may resubmit an application; in the event that same is not done, the Zoning Board of Appeals shall initiate such zoning changes as it deems necessary to preserve the
public interest. If construction falls more than two (2) years behind the schedule filed with the final plan, the plan becomes subject to revocation. The Administrative Officer shall monitor all pending PUD projects and inform the Zoning Board of Appeals of those six (6) months or more behind schedule.

Any changes or modifications which arise subsequent to the public hearing shall be specifically noted and referred to the Administrative Officer who shall determine whether the change constitutes a major or minor change and whether another public hearing is required.

4. The Zoning Board of Appeals shall, within sixty (60) days, approve, disapprove, or extend the time period for another sixty (60) days in taking action on the final plan.

5. All conditions, documents, and plans required by the Board must be delineated on the plan or agreed to in writing prior to Board approval.

All approved major changes in the final PUD plan shall be recorded with the county recorder as amendments to the final PUD plan.

2. Minor changes. The Administrative Officer may approve minor changes in the planned unit development which do not change the concept or intent of the development, without going through the "preliminary approval" steps. Minor changes shall be any change not defined as a major change.

E. To protect adjacent properties from the negative effects of incompatible development,
F. To establish a physically attractive pattern of development for the general welfare of the County.

The RCO extends along the Mississippi River and Rock River in the corporate limits of the County of Rock Island. The exact boundary of the RCO is delineated on the official County zoning map. E. Whether the proposed development is compatible with adjacent land uses and is designed to protect adjacent properties from adverse effects such as noise, glare, litter and unattractive features;

F. Whether the proposed development will be adequately served by public facilities; and

G. Whether the proposed development will have any negative environmental or physical impacts on the site or on adjacent properties.

3-2-33.13 EXEMPTIONS FROM SITE PLAN REQUIREMENTS

One and two family residences are exempt from the site plan requirements of the RCO. In addition, a site plan shall not be required for the renovation or expansion of an existing structure or use unless access points would be changed or a substantial increase in traffic to the site would be generated.

3-2-33.14 AMENDMENTS TO APPROVED SITE PLANS

Any amendment or change to an approved site plan must be submitted to the appropriate official for review. The appropriate official shall determine if the proposed amendment is a major change requiring review and approval by the appropriate public body. However, if in the opinion of the appropriate official, such structures would adversely affect adjoining or adjacent properties, such greater height shall not be authorized except by the Zoning Board of Appeals.

B. To places of public assembly such as churches, schools, and other permitted public and semi-public buildings not to exceed six (6) stories or seventy-five (75) feet, provided that for each foot by which the height of such building exceeds the maximum height otherwise permitted in the district, its side and rear yards shall be increased in width or depth by an additional foot over the side and rear yards required for the highest building otherwise permitted in the district.

C. To bulkheads, conveyors, derricks, elevators, penthouses, water tanks, monitors and scenery lofts; to monuments, fire towers, hose towers, cooling towers, grain elevators, gas holders or other structures, where the manufacturing process requires a greater height. Where a permitted use requires greater height. Where a permitted use requires greater heights than specified, it may be authorized by the Zoning Board of Appeals.

D. To hospitals, provided that for each foot by which the height of such building exceeds the maximum height otherwise permitted in the district, its side and rear yards shall be increased in width and depth by an additional one-half (½) foot over the side and rear yards required for the highest building otherwise permitted in the district.

Section 35 PERFORMANCE STANDARDS

3-2-35.0 COMPLIANCE WITH PROVISIONS

A. New Uses: Any use established in the business or industrial zones after the effective date hereof shall comply with the minimum performance standards contained in this Article.

B. Existing Uses: Existing business and industrial uses which are not in compliance with the performance standards contained in this
Article are exempt, except where a use did not comply with performance standards in effect prior to the effective date hereof (effective date).

Conditions which do not comply shall not be increased in scope or magnitude. Such uses shall be permitted to be enlarged or altered, provided the addition or change conforms with the applicable performance standards.

3-2-35.1 CERTIFICATION MAY BE REQUIRED

When necessary, the Appropriate official may require of the applicant certification by a registered professional engineer or other qualified person, at the expense of the applicant, that the performance standards for a proposed use can be met.

3-2-35.2 SMOKE EMISSIONS

The emission of smoke from any operation or activity shall not exceed a density or equivalent opacity permitted by the Illinois EPA.

3-2-35.3 PARTICULATE MATTER

No person shall operate or cause to be operated any process which emits particulate air contaminants exceeding the air quality standards of the Illinois Environmental Protection Agency (IEPA) or its successor.

A. Prior to the County issuing a certificate of occupancy, an applicant must submit to the appropriate official documentation of the IEPA approval of the applicant’s “application and permit to install or alter equipment or control equipment” if such a permit is required under the applicable IEPA standards.

B. In the event the IEPA lowers its air quality standards, the IEPA standards in effect on the adoption date of this ordinance shall remain applicable. Under these circumstances, prior to the County issuing a building permit, an applicant must submit to the Appropriate Official documentation from a licensed engineer demonstrating that the use complies with the IEPA standards (on the adoption date of this ordinance).

C. In the event the IEPA raises its air quality standards, the new IEPA standards shall apply, and the applicant must comply with the requirements of 35.3.b of this Section.
The release of airborne toxic matter from any operation or activity shall not exceed the fractional quantities permitted below of the threshold limit values adopted by the American Conference of Governmental Industrial Hygienists. If a toxic substance is not listed, verification that the proposed level of toxic matter will be safe and not detrimental to the public health or injurious to plant and animal life will be required. The measurement of toxic matter shall be on the average of any twenty-four (24) hour sampling period.

A. All B Zones and the I-UL Zone. In all B zones and in the I-UL zone, the release beyond lot lines of airborne toxic matter shall not exceed one-eighth (1/8) of the threshold limit values.

B. I-1 and I-2 Zones. In the I-1 and I-2 zones, the release of airborne toxic matter shall not exceed one-eighth (1/8) of the threshold limit values beyond zone boundary lines.

3-2-35.5 VIBRATION

Earth borne vibrations from any operation or activity shall not exceed the displacement values below. Vibration displacements shall be measured with an instrument capable of simultaneously measuring in three (3) mutually perpendicular directions. The maximum vector resultant shall be less than the vibration displacement permitted. The maximum displacements shall be determined by the following formula:

\[ D = \frac{K}{f} \]

where

- \( D \) = displacement in inches
- \( K \) = a constant given in table below
- \( f \) = the frequency of the vibration transmitted through the ground in cycles per second

3-2-35.8 STORAGE

A. The open storage of materials and equipment shall except for sales display shall be subject to the following requirements:

1. Storage of materials and equipment shall be completely screened from view. An eight foot (8') solid wall fence with a level ‘A’ bufferyard as described in Article 37 will be required.

2. All combustible material shall be stored in such a way as to include, where necessary, access drives to permit free access of firefighting equipment.

### C.

The underground bulk storage of flammable liquids shall be located in accordance with the Uniform Fire Code regarding tank storage underground, except the minimum distance between such underground tanks and any R zone boundary shall be at least ten feet (10').

C. Method of Measurement: Measurement is to be made at the nearest boundary of the nearest residential area or at any other point along the boundary where the level is higher. The sound levels shall be measured with a sound level meter and associated octave band filter as prescribed by the American Standards Association.

Section 36  ILLUMINATIONS PROVISIONS

Parking Facility and Exterior Security Lighting:

3-2-36.0  PURPOSE
The purpose of this section is to establish lighting requirements for personal safety and crime prevention while regulating any spill-over of light and glare on operators of motor vehicles, pedestrians, and land uses near a light source to promote personal and traffic safety and to prevent the creation of public nuisances.

3-2-36.1  LIGHTING PLAN
Except for single family and two family dwellings, plans for required parking lot and security lighting shall be approved by appropriate officials and the police department prior to approval and issuance of permits. Plans, at appropriate scale, shall be based on accurate, approved final site plans and shall depict all exterior lighting as to its location, orientation and configuration. This must include, but not be limited to:
A. Luminaire height;
B. Luminaire and standard technical specifications;
C. Intensity of illumination measured at the least point of illumination and the greatest point of illumination when measured from ground level;
D. Type of light source (Metal Halide, High Pressure Sodium, etc.);
E. Hours of illumination; and
F. Photometric plan superimposed on the site plan for each classification of lighting with points no greater than 30 feet apart.

3-2-36.2 ILLUMINATION PERFORMANCE STANDARDS
Lighting standards in all zoning districts except those containing single family and two family dwellings:

1. Wall or roof lighting may be used to illuminate the pedestrian walkways, entrance areas, and yard areas within 30 feet of the building. No wall or roof lighting shall be used to illuminate areas for motor vehicle parking or access unless the police department and the appropriate officials find the following:

   a. That the proposed lighting is not in conflict with the stated purpose in this section.
   b. That the proposed lighting will not unreasonably harm or restrict public health, safety, and welfare or create a nuisance; and
   c. The proposed luminaire has a cutoff angle of less than or equal to 66 degrees.

2. Any open area used for motor vehicle parking, storage, or access shall be illuminated with free-standing luminaries. Free-standing luminaries are permitted to be a maximum of 30 feet in height with a 3 foot support, for a maximum height from the ground of 33 feet. When a luminaire is located within 500 feet of a protected residential property, the maximum permitted luminaire height shall be 25 feet. All measurements shall be taken from the average elevation of the finished grade within 10 feet of the structure or fixture to the highest point of the luminaire. All luminaries must have a total cutoff angle equal to or less than 90 degrees. The use of exterior lighting with a cutoff angle greater than 90 degrees shall be permitted only when the police department and appropriate official find the following:

   a. That the lighting is not in conflict with the stated purpose
in this section;
b. That the proposed lighting will not unreasonably harm or restrict public health, safety, and welfare or create a nuisance; and
c. The proposed lighting will not result in an impairment of vision creating a hazard for vehicular or pedestrian traffic.

3. In no instance shall Low Pressure Sodium fixtures be used to illuminate non-protected residential property unless the police department find the following:

a. That the proposed lighting is not in conflict with the stated purpose in this section;
b. That the proposed lighting will not unreasonably harm or restrict public health, safety, and welfare or create a nuisance; and
c. The color distortion effect of Low Pressure Sodium lighting will not create a hindrance to crime prevention and investigation.

B. Intensity of lighting in all zoning districts except those containing single family and two family dwellings:

1. The amount of illumination attributable to exterior lighting from a property shall not exceed 1 foot-candle when measured at any boundary line with an adjoining property. This provision may be waived by the issuing authority when:

a. The proposed lighting is not in conflict with the stated purpose of this section;
b. The proposed lighting will not unreasonably harm or restrict public health, safety, and welfare or create a nuisance; and
c. The proposed lighting will not result in an impairment of vision creating a hazard for vehicular or pedestrian traffic.

2. All parking lot and parking structure lighting located within 300 feet of a protected residential property line may be illuminated not more than one (1) hour before the start of business and shall be extinguished within one (1) hour after the end of business except as approved by the police department after finding the following:
a. The property has been identified as an area where the incidence or potential for crime warrant additional lighting;
b. Additional lighting is required to increase visibility of a property which is not readily accessible for police during routine patrol; and
c. The use of timers, sensors, or other devices that produce a reduced lighting level that does not conflict with the stated purpose in this section.

C. Glare/Illumination

In all zoning districts, any lighting shall be arranged to reflect the light away from adjoining property. A person shall not conduct a use that has a source of illumination that produces glare clearly visible beyond a property line or creates a sensation of brightness within a visual field so as to cause annoyance, discomfort, or impairment of vision. The use of lenses, deflectors, shields, louvers, or prismatic control devices shall be used to eliminate nuisance and hazardous lighting to facilitate compliance with this requirement.

D. Parking structures

Luminaries used for illumination of designated pedestrian walkways in parking structures shall be of a significantly different color value than luminaries used for illuminating vehicle parking and drive aisles.

3-2-36.3 COMPLIANCE

Any new lighting installed after the effective date of this ordinance shall be in compliance with the requirements of this ordinance. Any lighting in existence before the effective date of this ordinance that does not comply with its requirements shall be considered legally non-complying and may remain, subject to the following provisions:

A. Alterations to existing lighting

1. When policies and support structures are removed and replaced for reasons other than acts of God or accidents, they must be replaced with luminaries, policies and supports that comply with this section; and
2. When luminaries are replaced, they must be replaced with luminaries that comply with all provisions of this section.

B. Removal and replacement of parking lot surface

When less than 50% of the gross area of the parking lot surface on a particular site is removed and replaced, only the parking area replaced must be provided with lighting in compliance with this section. If greater than 50% of the parking area on a particular site is removed and replaced at one time, the entire parking lot on the site where the construction activity occurs must be in full compliance with this section.

1. A parking lot or portion thereof is “removed and replaced” when any portion of the existing parking surface material is removed and a new surface is installed.

C. New parking lots or parking lot additions

When a new parking lot or addition to an existing parking lot is constructed, the new lot or lot addition must be provided with lighting in compliance with this section.

D. New structures, additions, or replacements

When a site is improved with new structures, or additions to, or replacements of existing structures, the lighting for the new structure, addition or replacement on the site must be upgraded with complying lighting. The parking lot lighting must be upgraded with complying lighting over a portion of the parking area that is equivalent to the amount of parking that would be required for the new structure, addition or replacement. In the event that the new structure, addition or replacement is accompanied by new or replaced parking area, the amount of upgraded lighting area shall be that required under this section.

E. Change of type of occupancy

When the type of occupancy of a site is changed, the lighting for the site shall be upgraded, to comply with this section for the structure and the parking lot be upgraded for the required parking for the occupancy as established in this code. For purpose of determining the type of occupancy of a site, the occupancy classifications of the County code shall be utilized.
F. Unoccupied sites

When a site has been unoccupied for a period of one year, the lighting shall be upgraded to fully comply with this section prior to any reoccupation of the site.

G. Development application

When a development application is made for a site, the County Board may, as a condition of approval, require compliance with any or all of the performance standards of this section and the extent of compliance required in such cases may be greater than that otherwise required in this section, if deemed reasonably necessary to protect the public health, safety, or welfare and to achieve the proposes of this section.

3-2-36.4 POINT OF MEASUREMENTS

Any light intensity measurement taken at the property line shall be measured at the greatest point of illumination of said property line. Any measurements to determine the minimum and maximum lighting levels internal to a site will be measured by positioning the meter horizontally at ground level at the greatest and least points of artificial illumination.

3-2-36.5 APPLICABILITY

Modifications to the requirements of this section may be approved as part of a final development plan for a planned development overlay district, pursuant to the provisions provided:

A. That any deviations from lighting standards established by this section are clearly delineated in the plan submission reviewed by the planning commission and approved by the County Board;

B. That any deviations are consistent with the purposes of this section;

C. That the minimum light level proposed provides a minimum of 75 percent of the illumination required in this section;

D. That the height of support poles above grade does not exceed the maximum permitted by this section by more than 25 percent, except that no development shall be allowed for increased support pole height within 500 feet of a protected residential property; and
E. That no increase in glare occurs as a result of deviation from the adopted standards.

LANDSCAPE AND BUFFERYARD REQUIREMENTS

Section 37 LANDSCAPE AND BUFFERYARD REQUIREMENTS

3-2-37.0 SITE PLANS

If a building or parking lot permit is applied for and no zoning action is required, an administrative site plan approval will be required.

3-2-37.1 SITE PLAN REVIEW

An application for a building or parking lot permit shall promptly be forwarded to the appropriate officials. Review must be completed within fifteen (15) days of the receipt by the County of a complete site plan review application. If, in the judgment of the appropriate officials, the site plan review application does not contain sufficient information to enable the appropriate County officials to properly carry out its responsibilities, the appropriate officials may request additional information from the applicant. In that event, the fifteen (15) day period previously referred to shall be suspended, pending the receipt of all information requested by the appropriate officials.

3-2-37.2 APPEAL PROCESS

If the appropriate officials approve a site plan, a building or parking permit may then be issued. If the appropriate officials do not approve a site plan, the applicant may appeal the appropriate officials’ decision to the Zoning Board of Appeals. A notice of appeal must be filed with the appropriate official no later than fifteen (15) days after receipt by the applicant of the decision of the appropriate officials.

3-2-37.3 EXEMPTION FROM SITE PLAN REQUIREMENTS

One and two family residences are exempt from County-wide site plan review requirements. In addition, site plans shall not be required for renovation or expansion of an existing structure or use unless access points would be changed or a substantial increase in traffic to the site would be generated.

3-2-37.4 PARKING LOTS
A. Permits for Off-Street Parking Lots - No person shall expand an existing parking lot or construct a new parking lot of five (5) spaces or more without having first obtained a written permit, issued by the appropriate official, or his designee representative. Prior to obtaining a permit for such expansion or new construction, the applicant shall submit to the appropriate official or his designated representative, a landscape/site plan as required in the Zoning Ordinance, and plans showing the construction specifications for all off-street parking lots and he shall provide for proper inspection of construction.

B. Construction - All off-street parking lots required to obtain a permit as identified in the above section shall be laid to the line and grade of, and shall conform to surface thickness and other specifications of the appropriate County official or his designated representative.

C. Landscaping and Screening Requirements for Off-Street Parking Lots - The provisions of this section for the installation and maintenance of landscaping and screening requirements are intended to protect the character and stability of residential, commercial, industrial and conservation areas, and to enhance the aesthetic and visual image of the County.

1. Parking lots of five (5) or more spaces shall be set back ten feet (10') from the front property line(s). Landscaping requirements with the front yard(s) include that the yard be seeded or sodded with lawn. Rock cover may be used, but may not exceed twenty percent (20%) of the landscaped front yard setback. In addition, one canopy tree for every five (5) parking spaces and a minimum of five percent (5%) ground cover landscape coverage of shrubs and evergreens/conifers shall be required.

   The ten foot (10') front yard setback may be reduced to five feet (5') if there is a continuous twenty-six inch (26") solid wall/fence or shrubbery hedge provided. Sodding, rock ground cover, canopy tree and ground cover landscape coverage requirements will still be applied if a solid wall/fence is provided. Sodding and/or rock ground requirements will still be applied if a shrubbery fence is provided.

2. Parking lots of five (5) or more spaces shall be set back five feet (5") from side and rear property lines. Landscaping
requirements within the side and rear yards include that the yard be seeded or sodded with lawn. Rock ground cover may be used, but may not exceed twenty percent (20%) of the landscaped side and rear yard setback. In addition, one canopy tree for every five (5) parking spaces and a minimum of five percent (5%) ground landscape coverage of shrubs and evergreens/conifers shall be required.

When a side and/or rear yard is adjacent to a residential use, a continuous four foot (4') solid wall/fence or shrubbery hedge shall also be provided with the five foot (5') setback yard. If a four foot (4') shrubbery hedge is provided, canopy tree and ground landscape coverage shall not be required.

3. Wherever landscaping and screening requirements may interfere with traffic vision, the height and placement shall be determined by the County Engineer.

4. Trees and other landscaping shall be of a species which are hardy to the area and have measured diameters of such identified in the Minimum Standards for Plantings section of this appendix. Prohibited trees are identified in the section so identified in this appendix.

5. Subject to the approval of the appropriate official, alternate landscaping plans may be substituted for consideration.

6. A landscape/site plan will be required to be submitted for staff review prior to issuing a parking lot development permit for parking lots of five (5) spaces or more. The following basic standards should be set:

   a. Drawn to scale;
   b. Identify location of landscaping or other features;
   c. Specify nature of materials (i.e., species, variety, etc.);
   d. Specify number of plants, shrubs, trees, etc., by species.

7. Landscaping and screening must be maintained in good condition, free of refuse and debris, and provide a healthy, neat and orderly appearance at least equal to the original installation. It shall be the owner’s responsibility to see that the landscaping is maintained.

D. Appeal Process - If the appropriate officials approve a site plan, a
parking lot permit may then be issued. If the appropriate officials
do not approve a site plan, the applicant may appeal the appropriate
officials' decision to the Zoning Board of Appeals. A notice of
appeal must be filed with the appropriate official no later than
fifteen (15) days after receipt by the applicant of the decision of the
appropriate officials.

3-2-37.5 BUFFERYARD REQUIREMENTS

A. Intent - The provisions of this section are to provide specific
landscape screening and bufferyard requirements to reduce the
incompatibility between zoning districts of different intensity and
type. These bufferyards will lessen the adverse impact of more
intense land uses upon residential areas and/or other areas of less
intense use by reducing noise, visual and other environmental
impacts.

B. Requirements - In addition to landscaping and screening
requirements for off-street parking areas, bufferyard standards will
also apply for site plans requiring a zoning change, special
use permit and non-exempt site plan review requirements. The
bufferyard requirement is determined by the difference between the
zoning district of the subject property and the zoning district of
adjacent properties. The specific requirements are identified in the
following sections and the accompanying table: “Schedule of
Bufferyard Requirements.” Landscaping and screening
requirements for off-street parking areas apply to the side of the
property abutting a public street right-of-way. A list of prohibited
trees is provided in the section entitled “Prohibited Trees”.

C. Description of Bufferyards A through D

1. Type A Buffer - The standard buffer within Type A is eight
feet (8') wide and contains the following number of required
plants per one hundred feet (100'):

   a. 1 canopy tree;
   b. 1 understory tree;
   c. 6 shrubs;
   d. 1 evergreen/conifer.

   Depending on the space available, the applicant may choose
one of several alternative buffer widths to provide a Type A
buffer, each with a different amount of required plantings.

c. Twelve-foot (12') wide buffer with eighty percent (80%) of the required plant units per one hundred feet (100').

d. Four-foot (4') wide buffer with ninety percent (90%) of the required plant units and a continuous hedge set back three feet (3') from the property line or fence.

2. Type B Buffer - The standard buffer with Type B is ten feet (10') wide and contains the following number of required plant per one hundred feet (100'):

a. 2 canopy trees;
b. 2 understory trees;
c. 6 shrubs;
d. 2 evergreens/conifers.

Depending on the space available, the applicant may choose one of several alternative buffer widths to provide a Type B buffer, each with a different amount of required plantings. Type B buffer alternatives range from a twenty-five foot (25') wide buffer with fifty percent (50%) of the required plantings to a five-foot (5') wide buffer with ninety percent (90%) of the required plantings and a continuous hedge or fence.

3. Type C Buffer - The standard buffer within Type C is fifteen feet (15') wide and contains the following number of required plantings per one hundred feet (100'):

a. 3 canopy trees;
b. 2 understory trees;
c. 9 shrubs;
d. 3 evergreens/conifers.

Depending on the space available, the applicant may choose one of several alternative buffer widths to provide a Type C
buffer, each with a different amount of required plantings.
Type C buffer alternatives range from a twenty-five foot (25') wide buffer with sixty percent (60%) of the required plantings to a six foot (6') wide buffer with ninety percent (90%) of the required plantings and a continuous fence.

4. Type D Buffer - The standard buffer within Type D is fifteen feet (15') wide and contains the following number of required plants per one hundred feet (100'):

a. 3 canopy trees;
b. 2 understory trees;
c. 15 shrubs;
d. 5 evergreens/conifers.

Depending on the space available, the applicant may choose one of several alternative buffer widths to provide a Type D buffer, each with a different amount of required plantings. Type D buffer alternatives range from a twenty-five foot (25') wide buffer with sixty percent of the required plantings to an eight-foot (8') wide buffer with ninety percent (90%) of the required plantings and a continuous fence.

3-2-37.6 MINIMUM STANDARDS FOR PLANTINGS

A. Canopy Trees - Two inches (2") diameter, six inches (6") above ground level, and ten feet (10') in height when planted.

B. Understory Tree - One inch (1") diameter, six inches (6") above ground level, and six feet (6') in height when planted.

N. Gingko

3-2-37.8 MAINTENANCE OF LANDSCAPING AND SCREENING

Bufferyard landscaping and screening must be maintained in good condition, free of refuse and debris and provide a healthy, neat and orderly appearance at least equal to the original installation. It shall be the owner’s responsibility to see that the landscaping is maintained.

DEVELOPMENT IN A SFHA

Section 38  DEVELOPMENT IN A SPECIAL FLOOD HAZARD AREA

AN ORDINANCE REGULATING DEVELOPMENT IN FLOODPLAIN AREAS

Be it ordained by the County Board of Rock Island County, Illinois as follows:

3-2-38.0  PURPOSE

This ordinance is enacted pursuant to the police powers granted Rock Island County by County Statutory Authority in 55 Illinois Compiled Statutes 5/5-1041 and 5/5-1063 in order to accomplish the following purposes:

A. to prevent unwise developments from increasing flood or drainage hazards to others;

B. to protect new buildings and major improvements to buildings from flood damage;

C. to promote and protect the public health, safety, and general welfare of the citizens from the hazards of flooding;

D. to lessen the burden on the taxpayer for flood control, repairs to public facilities and utilities, and flood rescue and relief operations;

E. to maintain property values and a stable tax base by minimizing the potential for creating blight areas; and

F. to make federally subsidized flood insurance available; and

G. To preserve the natural characteristics and functions of watercourses and floodplains in order to moderate flood and stormwater impacts, improve water quality, reduce soil erosion, protect aquatic and riparian habitat, provide recreational opportunities, provide aesthetic benefits and enhance community and economic development.

3-2-38.1  DEFINITIONS

For the purposes of this ordinance, the following definitions are adopted:
Base Flood - The flood having a one-percent probability of being equaled or exceeded in any given year. The base flood is also known as the 100-year flood. The base flood elevation at any location is as defined in Section 38.2 of this ordinance.

Base Flood Elevations (BFE) - The elevation in relation to mean sea level of the crest of the base flood.

Building - A structure that is principally above ground and is enclosed by walls and a roof including manufactured homes, prefabricated buildings, and gas or liquid storage tanks. The term also includes recreational vehicles and travel trailers installed on a site for more than 180 days per year.

Critical Facility - Any public or private facility which, if flooded, would create an added dimension to the disaster or would increase the hazard to life and health. Examples are public buildings, emergency operations and communication centers, health care facilities and nursing homes, schools, and toxic waste treatment, handling or storage facilities.

Development - any man-made change to real estate including, but not necessarily limited to:

a. demolition, construction, reconstruction, repair, placement of a building, or any structural alteration to a building,

b. substantial improvement of an existing building;

c. installation of a manufactured home on a site, preparing a site for a manufactured home, or installing a travel trailer on a site for more than 180 days per year;

d. installation of utilities, construction of roads, bridges, culverts or similar projects;

e. construction or erection of levees, dams, walls, or fences;

f. drilling, mining, filling, dredging, grading, excavating, paving, or other alterations of the ground surface;

g. storage of materials including the placement of gas and liquid
storage tanks; and

h. channel modifications or any other activity that might change the direction, height, or velocity of flood or surface waters.

(NOTE - Development does not include routine maintenance of existing buildings and facilities; resurfacing roads; or gardening, plowing, and similar practices that do not involve filling, grading, or construction of levees.)

Flood - A general and temporary condition of partial or complete inundation of normally dry land areas from the overflow, the unusual and rapid accumulation, or the runoff of surface waters from any source.

Flood Fringe - That portion of the floodplain outside of the regulatory floodway.

Flood Insurance Rate Map - A map prepared by the Federal Emergency Management Agency that depicts the floodplain or special flood hazard area (SFHA) within a community. This map includes insurance rate zones and may or may not depict floodways and show base flood elevations.

Floodplain - and Special Flood Hazard Area (SFHA) - are synonymous. Those lands within the jurisdiction of the County that are subject to inundation by the base flood. The floodplains of the Rock River, North Channel Rock River, Coal Creek, Coal Creek Tributary, Eckhart Creek, Kyte Creek, Meridosia Ditch Creek, Mississippi River, Mill Creek, Shaffer Creek, Sylvan Slough, Un-named Creek And Tributary to un-named Creek numbers 1, 2 and 3. are generally identified as such on the Flood Insurance Rate Map (FIRM) of Rock Island County prepared by the Federal Emergency Management Agency and dated October 18th, 2002. Floodplain also includes those areas of known flooding as identified by the community.

Floodproofing - Any combination of structural or nonstructural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate, property and their contents.

Floodproofing Certificate - A form published by the Federal Emergency
Management Agency that is used to certify that a building has been
designed and constructed to be structurally dry floodproofed to the flood
protection elevation.

Flood Protection Elevation - (FPE) The elevation of the base flood plus
one foot of freeboard at any given location in the floodplain.

Floodway - That portion of the floodplain required to store and convey the
base flood. The floodway for the floodplains of the Rock River, North
Channel Rock River, Coal Creek, Coal Creek Tributary, Eckhart Creek,
Kyte Creek, Meridossia Ditch Creek, Mississippi River, Mill Creek, Shaffer
Creek, Sylvan Slough, Un-named Creek And Tributary to un-named Creek
numbers 1,2 and 3. shall be as delineated on the Flood Insurance Rate Map
(FIRM) of Rock Island County prepared by the Federal Emergency
Management Agency and dated October 18th, 2002. The floodways for
each of the remaining floodplains of Rock Island County shall be
according to the best data available from Federal, State, or other sources.

IDNR/OWR - Illinois Department of Natural Resources/Office of Water
Resources.

Manufactured Home - A structure transportable in one or more sections,
that is built on a permanent chassis and is designed to be used with or
without a permanent foundation when connected to required utilities.

NFIP - National Flood Insurance Program.

Repetitive Loss - Flood related damages sustained by a structure on two
separate occasions during a ten year period for which the cost of repairs at
the time of each such flood event on the average equals or exceeds 25% of
the market value of the structure before the damage occurred.

SFHA - See definition of floodplain.

Substantial Damage - Damage of any origin sustained by a structure
whereby the cost of restoring the structure to its before damage condition
would equal or exceed 50% of the market value of the structure before the
damage occurred regardless of actual repair work performed. Volunteer
labor and materials must be included in this determination.

Substantial Improvement - Any reconstruction, rehabilitation, addition, or
improvement of a structure, taking place over the life of the structure, the cumulative cost of which equals or exceeds 50 percent of the market value of the structure before the improvement or repair is started. "Substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include either (1) any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe living conditions or (2) any alteration of a structure listed on the National Register of Historic Places or the Illinois Register of Historic Places.

Travel Trailer (or Recreational Vehicle) A vehicle which is:
   a. built on a single chassis;
   b. 400 square feet or less in size;
   c. designed to be self-propelled or permanently towable by a light duty truck;
   d. designed primarily not for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

3-2-38.2 Base Flood Elevation

This ordinance's protection standard is the base flood. The best available base flood data are listed below. Whenever a party disagrees with the best available data, the party shall finance the detailed engineering study needed to replace the existing data with better data and submit it to the FEMA and IDNR/OWR for approval prior any development of the site.

A. The base flood elevation for the floodplains of the Rock River, North Channel Rock River, Coal Creek, Coal Creek Tributary, Eckhart Creek, Kyte Creek, Meridosia Ditch Creek, Mississippi River, Mill Creek, Shaffer Creek, Sylvan Slough, Un-named Creek And Tributary to un-named Creek And Tributary to un-named Creek numbers 1, 2 and 3, shall be as delineated on the 100-year flood profiles in the Flood Insurance Study of Rock Island County, (Flood Insurance Study Number 17161CV000A) prepared by the Federal Emergency Management Agency and dated October 18th 2002.

B. The base flood elevation for each floodplain delineated as an "AH Zone" or "AO Zone" shall be that elevation (or depth) delineated on the
The base flood elevation for each of the remaining floodplains delineated as an "A Zone" on the Flood Insurance Rate Map of Rock Island County shall be according to the best data available from federal, state or other sources. Should no other data exist, an engineering study must be financed to determine base flood elevations.

3-2-38.3 DUTIES OF THE ADMINISTRATIVE OFFICER

The Administrative Officer shall be responsible for the general administration of this ordinance and ensure that all development activities within the floodplains under the jurisdiction of Rock Island County meet the requirements of this ordinance. Specifically, the Administrative Officer shall:

A. Process development permits in accordance with Section 38.4;

B. Ensure that all development in a floodway (or a floodplain with no delineated floodway) meets the damage prevention requirements of Section 38.5;

C. Ensure that the building protection requirements for all buildings subject to Section 38.6 are met and maintain a record of the "as-built" elevation of the lowest floor (including basement) or floodproof certificate;

D. Assure that all subdivisions and annexations meet the requirements of Section 38.7;

E. Ensure that water supply and waste disposal systems meet the Public Health standards of Section 38.8;

F. If a variance is requested, ensure that the requirements of Section 38.8 are met and maintain documentation of any variances granted;

G. Inspect all development projects and take any and all actions outlined in Section 38.10 as necessary to ensure compliance with this ordinance;

H. Assure that applicants are aware of and obtain any and all other required local, state, and federal permits;
I. Notify IDNR/OWR and any neighboring communities prior to any alteration or relocation of a watercourse;

J. Provide information and assistance to citizens upon request about permit procedures and floodplain construction techniques;

K. Cooperate with state and federal floodplain management agencies to coordinate base flood data and to improve the administration of this ordinance;

L. Maintain for public inspection base flood data, floodplain maps, copies of state and federal permits, and documentation of compliance for development activities subject to this ordinance.

M. Perform site inspections and make substantial damage determinations for structures within the floodplain; and

N. Maintain the accuracy of floodplain maps including notifying IDNR/OWR and/or submitting information to FEMA within 6 months whenever a modification of the floodplain may change the base flood elevation or result in a change to the floodplain map.

3-2-38.4 DEVELOPMENT PERMIT

No person, firm, corporation, or governmental body not exempted by law shall commence any development in the floodplain without first obtaining a development permit from the Administrative Officer. The Administrative Officer shall not issue a development permit if the proposed development does not meet the requirements of this ordinance.

A. The application for development permit shall be accompanied by:

1. drawings of the site, drawn to scale showing property line dimensions;

2. existing grade elevations and all changes in grade resulting from excavation or filling;

4. the elevation of the lowest floor (including basement) of all proposed buildings subject to the requirements of Section 38.6 of this ordinance; and

5. cost of project or improvements as estimated by a licensed engineer or architect. A signed estimate by a contractor may also meet this requirement.

B. Upon receipt of an application for a development permit, the Administrative Officer shall compare the elevation of the site to the base flood elevation. Any development located on land that can be shown by survey data to be higher than the current base flood elevation and which has not been filled after the date of the site’s first Flood Insurance Rate Map is not in the floodplain and therefore not subject to the requirements of this ordinance. Conversely, any development located on land shown to be below the base flood elevation and hydraulically connected, but not shown on the current Flood Insurance Rate Map is subject to the provisions of this ordinance. The Administrative Officer shall maintain documentation of the existing ground elevation at the development site and certification that this ground elevation existed prior to the date of the site's first Flood Insurance Rate Map identification.

3-2-38.5 PREVENTING INCREASED FLOOD HEIGHTS AND RESULTING DAMAGES

Within the floodway identified on the Flood Boundary and Floodway Map, and within all other floodplains where a floodway has not been delineated, the following standards shall apply:

A. except as provided in Section 38.5.b, no development shall be allowed which, acting in combination with existing and anticipated development, will cause any increase in flood heights or velocities or threat to public health and safety. The following specific development activities shall be considered as meeting this requirement:

1. Barge fleeting facilities meeting the conditions of IDNR/OWR Statewide Permit No. 3;

2. Aerial utility crossings meeting the conditions of IDNR/OWR

12. Any development determined by IDNR/OWR to be located entirely within a flood fringe area.

B. Other development activities not listed in Section 38.5.a may be permitted only if:

1. a permit has been issued for the work by IDNR/OWR (or written documentation is provided that an IDNR/OWR permit is not required); and
2. sufficient data has been provided to FEMA when necessary, and approval obtained from FEMA for a revision of the regulatory map and base flood elevation.

3-2-38.6 PROTECTING BUILDINGS

A. In addition to the damage prevention requirements of Section 38.5, all buildings located in the floodplain shall be protected from flood damage below the flood protection elevation. This building protection requirement applies to the following situations:

1. construction or placement of a new building valued at more than $1,000 or larger than 70 square feet;

2. substantial improvements made to an existing building. This alteration shall be figured cumulatively beginning with any alteration which has taken place over the life of the structure;

3. repairs made to a substantially damaged building. These repairs shall be figured cumulatively beginning with any repairs which have taken place over the live of the structure;

4. structural alterations made to an existing building that increase the floor area by more than 20%;

5. installing a manufactured home on a new site or a new manufactured home on an existing site (the building protection requirements do not apply to returning a manufactured home to the same site it lawfully occupied before it was removed to avoid flood damage); and

6. installing a travel trailer or recreational vehicle on a site for more than 180 days per year.

7. repetitive loss to an existing building as defined in Section 38.1.

B. Residential or non-residential buildings can meet the building protection requirements by one of the following methods:

1. The building may be constructed on permanent land fill in
accordance with the following:

a. the lowest floor (including basement) shall be at or above the flood protection elevation;

b. the fill shall be placed in layers no greater than six (6) inches before compaction and should extend at least ten feet beyond the foundation before sloping below the flood protection elevation;

c. the fill shall be protected against erosion and scour during flooding by vegetative cover, riprap, or other structural measure;

d. the fill shall be composed of rock or soil and not incorporate debris or refuse materials; and

e. the fill shall not adversely affect the flow of surface drainage from or onto neighboring properties and when necessary, stormwater management techniques such as swales or basins shall be incorporated; or

2. The building may be elevated in accordance with the following:

a. The building or improvements shall be elevated on stilts, piles, walls, or other foundation that is permanently open to flood waters;

b. The lowest floor and all electrical, heating, ventilating, plumbing, and air conditioning equipment and utility meters shall be located at or above the flood protection elevation;

c. If walls are used, all enclosed areas below the flood protection elevation shall address hydrostatic pressures by allowing the automatic entry and exit of flood waters. Designs must either be certified by a registered professional engineer or by having a minimum of one permanent openings on each wall no more than one foot above grade. The openings shall provide a total net area of not less than one square inch for every one square foot of enclosed area subject to flooding below the base flood elevation;
d. the foundation and supporting members shall be anchored and aligned in relation to flood flows and adjoining structures so as to minimize exposure to hydrodynamic forces such as current, waves, ice and floating debris;

e. the finished interior grade shall not be less than the finished exterior grade;

f. all structural components below the flood protection elevation shall be constructed of materials resistant to flood damage;

g. water and sewer pipes, electrical and telephone lines, submersible pumps, and other service facilities may be located below the flood protection elevation provided they are waterproofed;

h. the area below the flood protection elevation shall be used solely for parking or building access and not later modified or occupied as habitable space.

C. Manufactured homes or travel trailers to be permanently installed on site shall be:

1. elevated to or above the flood protection elevation; and

2. anchored to resist flotation, collapse, or lateral movement by being tied down in accordance with the Rules and Regulations for the Illinois Mobile Home Tie-Down Act issued pursuant to 77 IL Adm. Code 870.

D. Travel trailers and recreational vehicles on site for more than 180 days shall meet the elevation requirements of section 38.6c. unless the following conditions are met:

1. the vehicle must be either self-propelled or towable by a light duty truck. The hitch must remain on the vehicle at all times;

2. the vehicle must not be attached to external structures such as decks and porches;
3. the vehicle must be designed solely for recreation, camping, travel, or seasonal use rather than as a permanent dwelling;

4. the vehicle’s largest horizontal projections must be no larger than 400 square feet;

5. the vehicle’s wheels must remain on axles and inflated;

8. The vehicle must be licensed and titled as a recreational vehicle or park model; and

9. The vehicle must be either (a) entirely supported by jacks rather than blocks or (b) have a hitch jack permanently mounted, have the tires touching the ground, and be supported by blocks in a manner that will allow the blocks to be easily removed by use of the hitch jack.

E. Non-residential buildings may be structurally dry floodproofed (in lieu of elevation) provided a registered professional engineer or architect certifies that:

1. below the flood protection elevation the structure and attendant utility facilities are watertight and capable of resisting the effects of the base flood; and

2. the building design accounts for flood velocities, duration, rate of rise, hydrostatic and hydrodynamic forces, the effects of buoyancy, and the impact from debris and ice; and

3. floodproofing measures will be incorporated into the building design and operable without human intervention and without an outside source of electricity.

(NOTE: Levees, berms, floodwalls and similar works are not considered floodproofing for the purpose of this subsection.)
F. Garages or sheds constructed ancillary to a residential use may be permitted provided the following conditions are met:

1. the garage or shed must be non-habitable;

2. the garage or shed must be used only for the storage of vehicles and tools and cannot be modified later into another use;

3. the garage or shed must be located outside of the floodway;

4. the garage or shed must be on a single family lot and be accessory to an existing principal structure on the same lot;

5. below the base flood elevation, the garage or shed must be built of materials not susceptible to flood damage;

6. all utilities, plumbing, heating, air conditioning and electrical must be elevated above the flood protection elevation;

7. the garage or shed must have at least one permanent opening on each wall no more than one foot above grade with one square inch of opening for every square foot of floor area;

8. the garage or shed must be less than $7,500 in market value or replacement cost whichever is greater or less than 500 square feet;

9. the structure shall be anchored to resist floatation and overturning;

10. all flammable or toxic materials (gasoline, paint, insecticides, fertilizers, etc.) shall be stored above the flood protection elevation; and

11. the lowest floor elevation should be documented and the owner advised of the flood insurance implications.

G. A building may be constructed with a crawlspace located below the flood protection elevation provided that the following conditions are met:
1. the building must be designed and adequately anchored to resist flotation, collapse, and lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy;

2. any enclosed area below the flood protection elevation shall have openings that equalize hydrostatic pressures by allowing for the automatic entry and exit of floodwaters. A minimum of one opening on each wall having a total net area of not less than one square inch per one square foot of enclosed area. The openings shall be no more than one foot above grade;

3. the interior grade of the crawlspace below the flood protection elevation must not be more than 2 feet below the lowest adjacent exterior grade;

4. the interior height of the crawlspace measured from the interior grade of the crawl to the top of the foundation wall must not exceed 4 feet at any point;

5. an adequate drainage system must be installed to remove floodwaters from the interior area of the crawlspace within a reasonable period of time after a flood event;

6. portions of the building below the flood protection elevation must be constructed with materials resistant to flood damage; and

7. utility systems within the crawlspace must be elevated above the flood protection elevation.

3-2-38.7 SUBDIVISION REQUIREMENTS

The Rock Island County Board shall take into account flood hazards, to the extent that they are known, in all official actions related to land management use and development.

A. New subdivisions, manufactured home parks, annexation agreements, planned unit developments, and additions to manufactured home parks and subdivisions shall meet the damage prevention and building protection standards of Sections 38.5 and 38.6 of this ordinance. Any proposal for such development shall
include the following data:

1. the base flood elevation and the boundary of the floodplain (where the base flood elevation is not available from an existing study, the applicant shall be responsible for calculating the base flood elevation); and

2. the boundary of the floodway when applicable; and

3. a signed statement by a Registered Professional Engineer that the proposed plat or plan accounts for changes in the drainage of surface waters in accordance with the Plat Act (765 IL Compiled Statutes 205/2).

3-2-38.8 PUBLIC HEALTH AND OTHER STANDARDS

A. Public health standards must be met for all floodplain development. In addition to the requirements of Sections 38.5 and 38.6, the following standards apply:

1. No development in the floodplain shall include locating or storing chemicals, explosives, buoyant materials, flammable liquids, pollutants, or other hazardous or toxic materials below the flood protection elevation unless such materials are stored in a floodproofed and anchored storage tank and certified by a professional engineer or floodproofed building constructed according to the requirements of Section 38.6 of this ordinance;

2. Public utilities and facilities such as sewer, gas, and electric shall be located and constructed to minimize or eliminate flood damage;

3. Public sanitary sewer systems and water supply systems shall be located and constructed to minimize or eliminate infiltration of flood waters into the systems and discharges from the systems into flood waters;

4. New and replacement on-site sanitary sewer lines or waste disposal systems shall be located and constructed to avoid impairment to them or contamination from them during
flooding. Manholes or other above ground openings located below the flood protection elevation shall be watertight;

5. Critical facilities shall be protected to the 500-year flood elevation. In addition, all ingress and egress from any critical facility must be protected to the 500-year flood elevation; and

6. All other activities defined as development shall be designed so as not to alter flood flows or increase potential flood damages.

3-2-38.9 VARIANCES

Whenever the standards of this ordinance place undue hardship on a specific development proposal, the applicant may apply to the Rock Island County Zoning Board of Appeals for a variance. The Rock Island County Zoning Board of Appeals shall be the final decision making entity, subject to the appeals process in Section 6.1 of this ordinance, and may attach such conditions to granting of a variance as it deems necessary to further the intent of this ordinance.

A. No variance shall be granted unless the applicant demonstrates that all of the following conditions are met:

1. the development activity cannot be located outside the floodplain; and

2. an exceptional hardship would result if the variance were not granted; and

3. the relief requested is the minimum necessary;

4. there will be no additional threat to public health or safety, or creation of a nuisance; and

5. there will be no additional public expense for flood protection, rescue or relief operations, policing, or repairs to roads, utilities, or other public facilities; and

6. the applicant's circumstances are unique and do not establish a pattern inconsistent with the intent of the NFIP; and
7. all other required state and federal permits have been obtained.

B. The Administrative Officer shall notify an applicant in writing that a variance from the requirements of the building protection standards of Section 38.6 that would lessen the degree of protection to a building will:

1. result in increased premium rates for flood insurance up to $25 per $100 of insurance coverage; and

2. increase the risks to life and property; and

3. require that the applicant proceed with knowledge of these risks and that the applicant acknowledge in writing the assumption of the risk and liability.

C. Variances to the building protection requirements of Section 38.6 of this ordinance requested in connection with the reconstruction, repair or alteration of a site or building included on the National Register of Historic Places or the Illinois Register of Historic Places may be granted using criteria more permissive than the requirements of Sections 38.9.A.1 thru 38.9.A.5.

3-2-38.10 DISCLAIMER OF LIABILITY

The degree of protection required by this ordinance is considered reasonable for regulatory purposes and is based on available information derived from engineering and scientific methods of study. Larger floods may occur or flood heights may be increased by man-made or natural causes. This ordinance does not imply that development either inside or outside of the floodplain will be free from flooding or damage. This ordinance does not create liability on the part of the Rock Island County or any officer or employee thereof for any flood damage that results from proper reliance on this ordinance or any administrative decision made lawfully thereunder.

3-2-38.11 PENALTIES

Failure to obtain a permit for development in the floodplain or failure to
comply with the conditions of a permit or a variance shall be deemed to be a violation of this ordinance. Upon due investigation, the Administrative Officer may determine that a violation of the minimum standards of this ordinance exists. The Administrative Officer shall notify the owner in writing of such violation.

A. If such owner fails after ten days notice to correct the violation:

1. The Administrative Officer shall make application to the circuit court for an injunction requiring conformance with this ordinance or make such other order as the court deems necessary to secure compliance with the ordinance; AND;

2. The Administrative Officer shall make application to the Hearing Officer Division of Rock Island County (Rock Island County Code Enforcement System—RICCES) requesting fines as described in 38.11.a.3 and 38.11.a.4.; AND

3. Any person who violates this ordinance shall upon conviction thereof be fined not less than fifty ($50.00) nor more than five hundred dollars ($500.00) for each offense; AND

4. A separate offense shall be deemed committed upon each day during or on which a violation occurs or continues; AND

5. The Administrative Officer shall record a notice of violation on the title to the property.

B. The Administrative Officer shall inform the owner that any such violation is considered a willful act to increase flood damages and therefore may cause coverage by a Standard Flood Insurance Policy to be suspended.

C. Nothing herein shall prevent Rock Island County from taking such other lawful action to prevent or remedy any violations. All costs connected therewith shall accrue to the person or
3-2-2 ABROGATION AND GREATER RESTRICTIONS

This ordinance repeals and replaces other ordinances adopted by Rock Island County to fulfill the requirements of the National Flood Insurance Program including: Rock Island County Floodplain Ordinance, adopted 06/20/1995, as amended. However, this ordinance does not repeal the original resolution or ordinance adopted to achieve eligibility in the program. Nor does this ordinance repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. Where this ordinance and other ordinance easements, covenants, or deed restrictions conflict or overlap, whichever imposes the more stringent restrictions shall prevail.

3-2-38.13 SEPARABILITY

The provisions and sections of this ordinance shall be deemed separable and the invalidity of any portion of this ordinance shall not affect the validity of the remainder.

3-2-38.14 EFFECTIVE DATE

This ordinance shall be in full force and effect from and after its passage and approval and publication, as required by law.

Any such variance shall be granted only after a public hearing before the Board.

2. A variance may be granted only when special circumstances involving size, shape, topography, location or surroundings affect the property referred to in the application, when denial of said application would cause unreasonable or unnecessary hardship, and when said sign will not cause substantial injury to the value of other property in the vicinity nor be detrimental to the public safety or welfare and the neighborhood in which it is located.

3. Decisions of the Board. All decisions and findings of the Board, on appeal or upon application for a variance, after a hearing, shall in all instances be final administrative determinations and shall be subject to review by court as may be provided by law.

G. Penalties. Any person violating any of the provisions of this Ordinance shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not less than twenty-five (25) dollars nor more than five hundred (500) dollars. Each day such violation is committed or permitted to continue shall constitute a separate offense and shall be punishable as such hereunder.
H. Separability. If any section, subsection, sentence, any reason held invalid or unconstitutional by any court or competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions thereof.

I. Conflict of Cause. All ordinances and parts of ordinances in conflict herewith are hereby repealed insofar as they do so conflict.

J. Effective Date. This ordinance shall be in full force and effect from and after its passage and approval, as required by law.

Wind Energy

Section 40 WIND ENERGY

AN ORDINANCE REGULATING THE DEVELOPMENT OF WIND ENERGY SYSTEMS

3-2-40.0 AUTHORITY

This ordinance is adopted pursuant to authority granted by ILCS Chapter 55 Counties Division 5-12 Zoning and Section 5/5-1063 Building Construction, Alteration, Maintenance.

40.1 PURPOSE

The purpose of this ordinance is to preserve and protect public health and safety without significantly increasing the cost or decreasing the efficiency of a wind energy system and to allow for the orderly development of land, protect property values and esthetic conditions within the county. This ordinance does not repeal, abrogate, annul, impair, or interfere with any existing ordinance.

3-2-40.2 APPLICABILITY

This ordinance applies to all unincorporated lands within the boundaries of Rock Island County.
In this section the following definitions shall apply:

Agricultural Wind System- A wind system that has a nameplate capacity of less than the average electrical usage for the previous 12 months on the specific farm being served. A wind energy system that creates more energy than is needed for agricultural uses will have the excess sold back to the grid, and thus, is NOT exclusively for agricultural uses, and is NOT exempt from the requirements of this ordinance.

Board- The Zoning Board of Appeals.

Building Code- The Rock Island County Building Code as amended.

Code Administrator- The Zoning/Building Administrator/ the Director of Zoning & Building.

Comprehensive Plan- The Rock Island County Land Use Plan as amended.

County Board- The Rock Island County Board.

County Engineer- The Rock Island County Engineer.

Department- The Zoning/Building Department

Large Wind System- A wind energy system that has a nameplate capacity of more than 50 kilowatts, a total height of more than 100 feet, a blade diameter of more than 30 feet, and one or more wind towers with turbines.

Small Wind System- A wind energy system that has a nameplate capacity of 50 kilowatts or less, a total height of 100 feet or less, a blade diameter of 30 feet or less, and one OR MORE wind towers with turbines.

Total Height - The vertical distance from ground level to the tip of a wind turbine blade when the tip is at its highest point.

Wind Energy System- Equipment that converts and then stores or transfers energy from the wind into usable forms of energy and includes any base, blade, foundation, generator, nacelle, rotor, tower, transformer, turbine, vane, wire, or other component used in the system.
Wind Farm System- A wind energy system that includes two or more wind towers.

Wind Tower- The monopole, freestanding, or guyed structure than supports a wind turbine generator.

Zoning Ordinance- The Rock Island County Zoning Ordinance as amended.

3-2-40.4 STANDARDS

A. Location
1. A large wind energy system may only be located in areas that are zoned AG-1 Agricultural Preservation District, AG-2 General Agricultural District, I-1 Light Industrial District or I-2 General Industrial District, with a Special Use Permit and Building Permits. A small wind system may be located in areas that are zoned AG-1 Agricultural Preservation District, AG-2 General Agricultural District, SE-1 Suburban estates Low Density District, I-1 Light Industrial District and I-2 General Industrial District, with a Special Use Permit and Building Permits.

2. A large wind energy system shall be located 1000 feet or more from an occupied structure on an adjoining property and 1.1 times total tower height or more from occupied structure on subject property, measured from wind tower base.

3. A small wind energy system shall be located 1.1 times total tower height or more from an occupied structure on adjoining property and 80% total tower height or more from occupied structure on subject property measured from wind tower base.

B. Setbacks
1. A small wind system must be set back from all property lines of the parcel on which it is located and from any right-of-way a distance 1.1 times total tower height measured from wind tower base.
2. A large wind system must be set back minimum distances as follows:

   a. $1.1 \times$ total tower height from any and all public/private right-of-way lines measured from wind tower base.

   b. 100 feet from all other property lines measured from the tip of the blade when located parallel with the ground.

C. Spacing and Density
   A wind energy system shall be separated from any other wind energy system by a minimum of 200 feet measured from the tips of the blades when the blades are parallel with the ground.

D. Structure
   A wind energy system shall be of monopole construction to the extent practicable. If monopole construction is not practicable, a wind tower must be of freestanding construction to the extent practicable. If monopole or freestanding construction is not practicable, a wind tower may be guyed.

E. Height
   The total height of a wind energy system shall be 500 feet or less.

F. Clearance
   The vertical distance from ground level to the tip of a wind turbine blade when the blade is at its lowest point must be at least 25 feet.

G. Access
   All wind towers located in a wind energy system, including any climbing aids, shall be secured against unauthorized access by means of a locked barrier or security fence 6’ in height.

H. Electrical Wires
   All electrical wires associated with a wind energy system, other than wires necessary to connect the wind turbine to its base and to overhead collection lines, shall be located underground. The Board may vary this requirement upon proof of hardship.

I. Lighting
As required by the Federal Aviation Administration. Required lighting must comply with FAA minimum requirements and, whenever possible, be at the lowest intensity allowed using red lights at night. If more than one lighting alternative is available, the alternative that causes the least visual disturbance must be used.

J. Equipment
UNLESS LOCATED UNDERGROUND, any electrical equipment associated with a wind energy system shall be located under the sweep area of a blade assembly to the extent practicable.

K. Appearance, Color and Finish
The exterior surface of any visible components of a wind energy system must be a non-reflective, neutral color. Wind towers and turbines in an established wind farm system that are located within 1000 feet of each other must be of uniform design, including tower type, color, number of blades, and direction of blade rotation to the extent practicable.

L. Signs
No wind turbine, tower, building, or other structure associated with a wind energy system may be used to advertise or promote any product or service. No word or graphic representation, other than appropriate warning signs and owner identification, may be placed on a wind turbine, tower, building, or other structure associated with a wind energy system so as to be visible from any public road.

3-2-40.5 PERMIT REQUIREMENTS

A. Special Use Permit
A special use permit approved by the County Board is required for each wind energy system except for a Agricultural Wind System as defined in this section. See this Ordinance, Article XI, section 6.3, Special Uses.

B. Building Permit
A building permit is required for the installation of each wind energy system except for an Agricultural Wind System as defined in this section. See Rock Island County Building Code as amended.

C. Expiration
A Special Use Permit issued pursuant to this ordinance expires if:

1. The wind energy system is not installed and functioning within 5 years from the date the permit is issued; or

2. The wind energy system is out of service or otherwise unused for a continuous 12-month period. See 40.06 of this section. The Board may grant reasonable extensions to the 5 year and 12 month deadlines provided action to amend the inactivity has been active and consistent though the time period involved. For purposes of this section, placing the system for sale or intending to use the system at a future date does NOT constitute active and consistent activity.

D. Fees

1. The application for a special use permit must be accompanied by the fee required for each wind energy system.

2. The application for a building permit must be accompanied by the fee required for each wind energy system.

3. An Agricultural Wind System as defined in this section is exempt from zoning and building fees.

E. Financial Assistance

1. REASONABLE EVIDENCE of financial ability to construct, maintain and decommission the Wind Energy System is a condition precedent to the issuance of any special use or building permit under this ordinance.

2. Rock Island County and/or the property owner leasing land for a wind energy system may require a performance bond, surety bond, escrow account, letter of irrevocable letter of credit or other financial assurance to Rock Island County and/or the property owner for each wind energy system that guarantees the performance of the restoration requirement set forth in Section 40.06.

3-2-40.6 RESTORATION REQUIREMENT
A. A wind energy system that is out of service for a continuous 12-month period will be deemed to have been abandoned. The Code Administrator may issue a Notice of Abandonment to the owner of a wind energy system that is deemed to have been abandoned. The Code Administrator shall withdraw the Notice of Abandonment if the Board approves a reasonable extension based on hardship conditions. Efforts to operate the system must be shown to have been active and consistent though the time period involved. For purposes of this section, placing the system for sale or intending to use the system at a future date does NOT constitute active and consistent activity.

B. The owner of a wind energy system shall provide the Code Administrator with a written Notice of Termination of Operations if the operation of a wind energy system is terminated.

C. Within 8 months of receipt of Notice of Abandonment or within 8 months of providing Notice of Termination of Operations, the owner of a wind energy system must:

1. Remove all wind turbines, aboveground improvements, and outdoor storage; and

2. Remove all foundations, pads, and underground electrical wires to a depth of 4 feet below the surface of the ground; and

3. Remove all hazardous material from the property and dispose of the hazardous material in accordance with federal and state law.

4. Failure to comply with any of the conditions or restrictions imposed on a special use permit shall be deemed a violation of the Zoning Ordinance.

D. All Code Administrator determinations may be appealed to the Board.

3-2-40.7 SPECIAL USE PERMIT PROCEDURE

A. Special use permit applications shall be submitted to the Code Administrator. The application must be on a form approved by the
Code Administrator and must be accompanied by 10 copies of a scaled drawing, other descriptive information sufficient to enable the Committee and Board to determine whether the requirements of this ordinance will be satisfied, and such other information as may be specified on the application form. The Code Administrator will review the application materials for completeness and may request that the applicant provide additional information. When the Code Administrator determines that the application is complete, the Code Administrator will forward it to the Board.

B. The Board will conduct a meeting and hearing on the application within 60 days after application submittal and minimum 15 day public notice. Following the public meeting and hearing the Board will submit recommendations and finding of facts to the County Board.

C. The County Board may grant a special use permit if it determines that the requirements of this ordinance are met and that granting the permit will not unreasonably interfere with the orderly land use and development plans of the county. Both the Board and County Board may include conditions in the permit as provided if those conditions preserve or protect the public health, safety and property values. Both the Board and County Board may consider the following factors when setting conditions:

1. Proposed ingress and egress.
2. Proximity to transmission lines to link the system to the electric power grid.
3. Number of wind turbines and their location.
4. Nature of land use on adjacent and nearby properties.
5. Location of other wind energy systems in the surrounding area.
7. Proximity to residential structures, residential zoning districts, or areas identified for future residential use.
8. Design characteristics that may reduce or eliminate visual obtrusiveness.
9. Possible adverse effects on migratory birds, raptors, and other animals and wildlife.
10. Possible adverse effects of stray voltage, interference with broadcast signals, shadow effect, and noise.
11. Impact on the orderly development, property values, and esthetic conditions within the county.
12. Recommendations of interested parties that may be affected by the wind energy system.
13. Any other factors that are relevant to the proposed system.

D. The Board may consider variances to one or more of the factors. See Rock Island County Zoning Ordinance Article XI, Section 6.0, Variances.

E. The Committee and Board recommendations, finding of facts and any conditions will be recorded in the minutes and forwarded to the County Board for final determination.

F. The County Board final decision to approve or reject the special use permit application may be appealed to the Circuit Court.

3-2-40.8 BUILDING PERMIT PROCEDURE

A. Building permit applications shall be submitted to the Code Administrator. The application must be on a form approved by the Code Administrator and must be accompanied by two copies of a drawing that shows the proposed location and distance of the wind energy system with reference to the property lines of the parcel on which it is located; any residence, business, or public building on an adjacent parcel; the right-of-way of any public road that is within 500 feet; and such other information as may be specified on the application form. Construction plans prepared and sealed by a structural engineer licensed to practice in Illinois stating and illustrating compliance with the Rock Island County Building Code as amended will be required for each wind energy system. Special inspections by approved 3rd party inspection agencies will be required and costs to be paid directly from the developer in addition to all other necessary fees. A copy of the FAA permit for lighting, if necessary, will also be required.

B. The Code Administrator should issue a permit or deny the application within one month of the date on which the application is received.
The Code Administrator will issue a building permit for a wind energy system if the application materials show that the proposed tower location meets the requirements of this ordinance, building code and the special use permit issued by the County Board.

If the application is approved, the Code Administrator will return one copy of the drawing with the building permit and retain the other copy with the application.

If the application is rejected, the Code Administrator will notify the applicant in writing and provide a written statement of the reason why the application was rejected.

The building permit must be conspicuously posted on the premises so as to be visible to the public at all times until construction or installation of the tower is complete.

All Code Administrator determinations may be appealed to the Board.

3-2-40.9 SIGNAL INTERFERENCE

The owner of a wind energy system must take such reasonable steps as are necessary to prevent, eliminate, or mitigate any interference with cellular, radio or television signals caused by the wind energy system.

3-2-40.10 VIOLATIONS

It is unlawful for any person to construct, install, maintain, modify, or operate a wind energy system that is not in compliance with this ordinance or with any condition contained in a special use or building permit issued pursuant to this ordinance. See applicable Zoning Ordinance, Building Code and ILCS sections.

3-2-40.11 ADMINISTRATION AND ENFORCEMENT

A. This ordinance shall be administered by the Code Administrator.
The Code Administrator may enter any property for which a special use or building permit has been issued under this ordinance to conduct an inspection to determine whether the conditions stated in the permit have been met as specified by statute, ordinance and code.

3-2-40.12 PENALTIES

A. Zoning – petty offense. Maximum $500 fine with each day a violation continues uncorrected constituting a separate offense. Building – petty offense. Maximum $500 fine with each day a violation continues uncorrected constituting a separate offense.

B. Nothing in this section shall be construed to prevent the county from using any other lawful means to enforce this ordinance.

3-2-40.13 COUNTY HIGHWAY AND TOWNSHIP ROAD AGREEMENTS

Each wind energy system shall have a written agreement with County Engineer and respective Township Highway Commissioner(s) regarding use of county/township road, bridges and right-of-way. Performance/surety bonds or other financial assurance documents may be required to guarantee the performance of the road agreements.

3-2-40.14 WIND ENERGY SYSTEM OWNER/PROPERTY OWNER RESTORATION AGREEMENT

Each wind energy system lease shall have a signed agreement between wind energy system owner and property owner regarding restoration requirements as discussed in this ordinance.

3-2-40.15 SEVERABILITY

The provisions of this ordinance are severable, and the invalidity of any section, subdivision, paragraph, or other part of this ordinance shall not affect the validity or effectiveness of the remainder of the ordinance.

Section 41 FEES, PENALTIES

3-2-41.0 FEES
All applications for Map Amendments, Special Uses, and Variances filed for or on behalf of the property owner, shall be accompanied by payment of a fee as adopted by the Rock Island County Board from time to time. No application shall be considered complete and subject to review by the Zoning Board of Appeals until such fee has been paid. Where a LESA (Land Evaluation Site Assessment) report is required, the appropriate fee will be collected and forwarded to the Rock Island County Soil and Water Conservation District for the preparation of the LESA report.

3-2-41.1 PENALTIES

Any person, firm or corporation, agent employee, or contractor of such who violates, disobeys, omits, neglects, or refuses to comply with or who resists enforcement of any provisions of this Ordinance, shall upon conviction forfeit not less than twenty-five ($25.00) dollars nor more than two hundred ($200.00) dollars for each offense, together with the costs of prosecution, and in default of payment of such forfeiture and costs of prosecution shall be imprisoned in the County jail of Rock Island County until said forfeiture and costs are paid, for a period not exceed thirty (30) days for each violation. Each day that a violation continues to exist shall constitute a separate offense.

Section 42 VALIDITY AND REPEAL

3-2-42.0 VALIDITY

Should any section or provision of this Ordinance be declared by the courts to be unconstitutional or invalid, such decision shall not affect the validity of the Ordinance as a whole, or any part thereof, other than the part so declared to be unconstitutional or invalid.

3-2-42.1 CONFLICT AND REPEALER

RURAL LIVING CONTRACT

Introduction: Life in the rural areas of the County is different from life in the city. County governments may not be able to provide the same level of service that city governments provide. To that end, we are providing you with the following information to help you make an informed decision before you purchase a parcel of land in rural Rock Island County.

1. Agriculture: Some of the people who feed this nation (and the world) work right here in Rock Island County. If you are going to move your family into their work area, it is important you understand how their job, work environment, and hours of operation may affect you.

   - Farmers often work around the clock, especially during planting and harvest time. It is possible that adjoining agriculture uses from lighting and noise may disturb your peace and quiet 24 hours a day.

   - Land preparation and other agricultural operations, as well as rural roads, cause dust, especially during windy and dry weather.

   - Farmers occasionally burn ditches and fields to keep them free of debris and weeds. This is a normal part of a farming operation, and this may create objectionable smoke. During these burns it may be necessary to stay inside or leave your residence for a short time if you have a sensitivity to it.

   - Chemicals (mainly fertilizers, pesticides and herbicides) are often used in agricultural activities and may be applied via irrigation systems, ground vehicles or various aircraft. You may be sensitive to these substances and some people may actually have allergic reactions. They may “drift” causing damage to your landscaping. Make sure you leave enough of a buffer area from YOUR property line to avoid damage. These are necessary tools for agricultural areas of our County, and you must be aware of/ prepared to deal with their application.

   - Farm animals are raised in the country and they can generate odors that can be very strong at times. They also make noise, draw insect populations, and sometimes get loose from their pasture or holding areas. In the city, large numbers of animals near your residence would be a nuisance, in the rural areas,
Agriculture is an important part of the Rock Island County economy. If you choose to live in the work area of farmers, you cannot expect County government to intervene in the normal day-to-day operations of your agribusiness neighbors. In fact, we are more likely to require you to stay out of his or her way as this is their workplace and you have made the decision to build a home in their work area.

- Farmers must move their equipment between fields. Every time you are running late, a large piece of slow-moving farm equipment will be on the road in front of you. They may take up both lanes so you cannot pass. Anticipate these delays and be patient, keeping their, your, and other’s safety at the forefront.

- Farm animals can be dangerous and can attack humans. Children need to know that it may not be safe to enter pens where farm animals are kept, even the little cute ones. It is your responsibility to teach your children respect for livestock, property and property lines of your neighboring farmer.

- Livestock animals being herded from one location to another have the right-of-way on County roads and highways. You MUST yield to them even if it delays you.

- Insects may be more of a problem in the country than they are within city limits. Insects feeding on actively growing crops or emerging from cropland can migrate to landscaping and gardens adjacent to cropland. It will be your responsibility to control them if they become a nuisance.

- Farm, hay, pasture and timber ground is not open for your use to hunt, ride ATV’s, etc. unless you have requested and been given permission to do so by the owner or tenant. These areas are also not to be used as dumping grounds.

2. Access: The fact that you can drive to your property does not necessarily guarantee that you have legal ingress/egress or that your guests and emergency service vehicles can achieve that same level of access at all times. You cannot
assume that you have an automatic easement across someone else’s property to enter your property. Also consider:

- Emergency response times (sheriff, fire suppression, medical care, etc.) may be much longer than in an incorporated city. Under some extreme conditions, you may find that emergency response is extremely slow due to circumstances beyond their control. Some fire, ambulance and search and rescue services in Rock Island County are volunteer and may provide limited services. Check with the departments or organizations that provide these services if you are contemplating residing in their jurisdictions.

- Rock Island County has it’s own road system to take care of, and there are also 18 Township road districts totaling hundreds of miles of roads, ranging from paved to unimproved dirt roads. There are also a number of roads that are Private Drives, and these may have a homeowners association to whom you pay dues, which is responsible for the maintenance of roads, bridges, plowing etc.

- Rock Island County can experience adverse weather conditions that may cause damage to roads. It is wise to determine who is responsible for the maintenance of the roads providing access to your property.

- Many large construction vehicles and some fire and rescue vehicles cannot navigate small, narrow roads. If you plan to build, it is prudent to check out construction and emergency vehicle access. Remember, it may be more expensive to build a rural residence due to delivery fees and the time required for building materials to reach your site.

- School buses travel only on maintained public roads that have been designated as school bus routes by the local school district (some subdivision roads are private). In order for your child or children to get to school, you may be responsible to drive your children to the nearest County road or designated school bus route. Please check with the appropriate school district for school locations and routes.

- In extreme weather, even the best County maintained roads could become impassable. You may miss work or appointments.

- Dust, again, is an unpleasant fact of life for most rural residents. If your road is unpaved, it is unlikely that any one of the nineteen highway districts will pave it in the foreseeable future. Remember that unpaved roads are not always
smooth and you may experience increased vehicle maintenance costs when regularly traveling on rural County roads.

- Mail delivery may not always be available to some rural areas of the County. Ask the postmaster to describe the system for your area. This may also apply to package delivery services as well.

3. Services: Water, sewer, electric, fire, telephone and other services may be unavailable or have more frequent interruptions. Repairs may take longer due to their rural nature. Cellular communications may be a problem in some areas of Rock Island County.

- Sewer service is not available to sites located outside city limits. You will need to use an approved subsurface sewage (septic) system or other treatment process. The type of soil, depth to ground water or bedrock, slope, etc. will be very important in determining the cost and function of your subsurface sewage system. Ask for assistance from the Rock Island County Health Department (309-794-7061) for information on how to get a system approved or inspected.

- Most unincorporated areas do not have access to a water supply for domestic use, so you will need to locate an alternate supply. The most common method is use of a well. The cost for drilling and pumping may be considerable and the quality and quantity of water (also known as the yield) can vary considerably from location to location and seasonally.

- It is important to determine the proximity of electric power because it can be expensive to extend power lines to very remote areas. In addition, if you have special power requirements, it is important to know what level of service can be provided to your property. Natural Gas may not be available and Propane is more expensive.

- Power outages can occur in outlying areas with a greater frequency than in cities. A loss of electrical power can also interrupt a private water supply from a well. Extended power outages may also cause a loss of food in freezers or refrigerators and power outages may cause problems with computers. It may be important to be able to survive temporarily in severe weather with no utilities if you live in the country.

- Trash removal may be more expensive in rural areas. It is illegal to create your own trash dump, even on your own property. Know the cost for trash removal prior to making the decision to move into the country. In some cases, the only
option may be to haul your trash to a local landfill (state and County law prohibits burning of domestic trash in a burn barrel). Recycling services may not be available in rural areas.

4. Your property: There are many issues that can affect your property. It is important to research them before purchasing land in rural areas of the County. Easements may require you to allow the construction of roads, power lines, water lines, sewer lines, etc. across your land. There may be easements that have not been recorded by the County or as part of the original property. Check these issues carefully.

- You may be provided with a map of your property, but unless the land has been surveyed and pins placed by a licensed surveyor, you should not assume that the map is accurate.

- Fences that separate properties are sometimes misaligned with the actual property lines. A survey of the land by a licensed surveyor is the only way to confirm the location of property lines. Illinois law can require you to pay for half of your agricultural neighbors fence if it needs repaired or replaced. (Illinois law says you may be responsible for the right half of the fence line as you are facing it from your property.)

- Before you purchase that home with the beautifully manicured 5 acre yard, (or 10 acres or 2 acres) you should consider the effort required to maintain it. A large yard requires a lot of time and work, and if you decide to split your acreage to make the yard smaller, the County may not allow it. (There are areas where 40 acres is the smallest lot size allowed, and parcels of five acres or less cannot have grass higher than 12 inches.)

- The surrounding properties may not remain as they are indefinitely. If you are moving to the country on a small piece of ground, anticipate that others will do the same thing, even right next to your property. Also, be aware that vacant ground or crop ground may have cattle or hogs on it next year.

- Flowing water can be a hazard, especially to young children. Before you decide to locate your home near an active ditch, canal or other water conveyance, consider the possible danger to your family and your responsibility to take safety measures.

- If you are purchasing a parcel close to a city or within a city area of impact (1.5 miles from the city border), annexation in the future is a possibility. If you live
near a school, future development is likely, and will be encouraged by the County.

5. Mother Nature: Residents of the County may experience more problems when the elements and earth turn unfriendly. Here are some thoughts for you to consider:

- Black ice or icy conditions on rural roadways is always a probability.

- The topography of the land can give you an indication of where the water will flow during large precipitation events. When property owners fill in natural drainages, they may cause the water that once drained naturally to drain through unwanted areas potentially causing property damage to you or your neighbor’s property.

- Floodplains have been designated by the United States Geologic Survey (USGS) within the County. Portions of the County require special building considerations if located within the floodplains. It is advisable to consult Rock Island County Zoning & Building Office before buying or building.

- Nature can provide you with some wonderful neighbors. However, even harmless wildlife can cross the road unexpectedly and cause traffic accidents. Rural development encroaches on the traditional habitat of animals that may be dangerous. In general, it is best to enjoy wildlife from a distance. It is important that you handle your pets and trash properly so that they will not create problems for you and/or the wildlife.

In Conclusion: Rock Island County is a wonderful place to live, work, and raise a family. This contract is designed to provide information that will help enhance the quality of life here. Respect your agri-neighbor’s livelihood and property, and be aware that your actions may impact your neighbors, human and otherwise. While the information presented here is intended as a guideline and an introduction into some of the realities of rural living, you may discover other issues that have not been covered by this document. We encourage you to research and examine all aspects of country living prior to moving to a rural setting so you will enjoy the country and not have any unpleasant surprises.

Rock Island County elected officials, administration and staff pride themselves on their accessibility. By participating in the publication of the Rural Living Contract, Rock Island County is in no way divesting itself of its responsibility to its constituents, rather, is attempting to make clear to constituents what those
responsibilities are. We offer this publication in the sincere hope that it will help you better understand how things work in Rock Island County.

I/we have read the above and not only understand the items mentions, but understand the more general concept of rural living, and I/we hereby agree to live according to these concepts, whether specifically mentioned or implied.

E. At any time prior to the completion by the Applicant of the presentation of the Applicant’s factual evidence and an opportunity for cross-questioning by the County and any participants, the Applicant may file not more than one amended application upon payment of additional fees to cover the reasonable and necessary costs incurred by the County in the siting review process; in which case time limitations for final action by the governing body of the County shall be extended for an additional period of ninety (90) days.

3-5B-8 SITE APPROVAL DECISION

A. After the public hearing and any continuation thereof, the PCF Committee shall hold a meeting for purposes of developing a written recommendation and proposed decision to the County Board on the request for site location approval. If findings of fact are made, such findings shall be supported by the record. The written recommendation and proposed decision of the PCF Committee shall be delivered to the County Board for consideration by the County Board in making its decision on the request for site location approval.

B. The County Board's decision on the request for site location approval shall be based on the following criteria:

1. The facility is necessary to accommodate the waste needs of the area it is intended to serve;
2. The facility is so designed, located and proposed to be operated that the public health, safety and welfare will be protected;
3. The facility is located so as to minimize incompatibility with the character of the surrounding area and to minimize the effect on the value of the surrounding property;
4. (a) For a facility other than a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100-year flood plain, or the site is flood-proofed;
(b) For a facility that is a sanitary landfill or waste disposal site, the facility is located outside the boundary of the 100-year flood plain, or if the facility is a facility described in subsection (b) of Section 22.19a of the Act, the site is flood-proofed;

5. The plan of operations for the facility is designed to minimize the danger to the surrounding area from fire, spills, or other operational accidents;

6. The traffic patterns to or from the facility are so designed as to minimize the impact on existing traffic flows;

7. If the facility will be treating, storing or disposing of hazardous waste, an emergency response plan exists for the facility which includes notification, containment and evacuation procedures to be used in case of an accidental release;

8. If the County Board has developed a solid waste management plan consistent with the planning requirements of the Local Solid Waste Disposal Act or the Solid Waste Planning and Recycling Act, the facility is consistent with said plan; for purposes of this criterion, the “solid waste management plan” means the County Solid Waste Management Plan; and

9. If the facility will be located within a regulated recharge area, any and all applicable requirements specified by the IPCB for such area have been met.

C. The County Board may consider as evidence the previous operating experience and past record of convictions or admissions of violations of the Applicant (and any subsidiary and parent corporation) in the field of solid waste management when considering criteria B(2) and B(5) under this Section.

D. Pursuant to Section 39.2(a) of the Act, local siting approval shall be granted only if the proposed facility meets the criteria cited above.

E. The County Board shall make a final written decision within 180 days from the date of filing of the site approval request, specifying the reasons for the decision, which reasons shall be in conformance with Section 39.2(a) of the
Act. The County Board may conditionally approve of any request for site approval provided such conditions are not inconsistent with regulations promulgated by the IPCB. Any determination by the County Board shall be supported by the record, which record shall be made available for review by all members of the County Board.

F. No written determination by the County Board of a site approval request may be reconsidered.

3-5B-9 EX PARTE COMMUNICATIONS PROHIBITED

In recognition of the quasi-judicial role of each Member of the County Board and the State’s Attorney, ex-parte communications with persons other than Members of the County Board or the State’s Attorney concerning the request for site approval are prohibited between the date of filing of the request for site approval and the date of the final decision of the County Board (or the 180th day after said date of filing). Although the Members of the County Board are encouraged not to attend meetings at which the Member knows the request for site approval may be discussed, it is inevitable that due to their regular legislative duties over the course of time during the consideration of the request for site approval they may be in attendance at such meetings (e.g. attendance at a municipality’s council of governments meeting, attendance at a local chamber of commerce meeting). As such, the Member is required to obtain and file a transcript of any meeting, where such meeting has been transcribed or recorded, or otherwise disclose such meeting in the public records (such as disclosing it on the record during the transcribed public hearings or during the written comment period provided for in Section VI of this ordinance). The transcript shall not, however, be utilized by the County in reaching its decision.

3-5B-10 ADMINISTRATION OF FEES AND COSTS

A. All expenses incurred by the County in conducting the review of the request for site approval; conducting the public hearing; making the site approval decision; and responding to any appeal thereof by a person other than the Applicant shall be paid by the Applicant, including the costs of any consultants, attorneys or hearing officer utilized by the County in connection with the request for site approval, costs of court reporting and transcripts for the public hearing, and witness fees. Said expenses shall be paid from the Application Fee.

B. The County shall periodically submit a detailed accounting and summary of all expenditures and reimbursements, authorized pursuant to Section IX(A) above, to the Applicant for payment.
3-5B-11 SEVERABILITY

If any section, subsection, sentence, clause, phrase or portion of this Ordinance, as amended, is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions hereof.

3-5B-12 EFFECTIVE DATE

From and after the effective date of this Ordinance, the County Board Chairman and County Clerk are hereby authorized and directed to do all things necessary and essential, including the execution of any documents and certificates necessary to carry out the provisions of this Ordinance.

This Ordinance shall be in full force and effect from and after its passage, approval and publication in the manner provided by law.

This Agreement shall be effective provided, however, that the County has not, by entering into this Agreement, predetermined whether it will grant or deny site location approval or whether MWI can (or cannot) establish any of the criteria related to site location approval, and the County retains all of its authority to grant, deny, or grant with conditions site location approval in accordance with Section 39.2 of the Act.

3-6-3 TERM OF AGREEMENT

This Agreement commences on the Effective Date and shall remain in force and effect until the Expiration Date.

3-6-4 BAN ON HAZARDOUS WASTE
MWI shall not knowingly accept, treat, or dispose of any waste which is defined as hazardous by the Act or the regulations adopted thereunder ("Hazardous Waste") at the Property. MWI shall comply with all regulations of the Illinois Pollution Control Board ("IPCB") relative to load checking, and shall immediately inform the County orally and in writing of any Hazardous Waste that has been accepted and disposed on the Property.

For at least 20 years after the Opening Date or for the life of the Landfill if a longer period of time, MWI shall provide the County with disposal capacity at the Landfill for all of the Solid Waste that is generated within the County’s boundaries and that is not defined as Hazardous Waste, provided, however, that MWI is permitted to receive said Solid Waste. MWI’s obligation to provide the County with disposal capacity shall extend only to Solid Waste that is initially abandoned or discarded within the County, and specifically excludes such out-of-County waste that may be delivered to a waste transfer station located within the County. At all times during which the Landfill is in operation, MWI shall provide first priority to the disposal of the County’s Solid Waste. The County shall provide supporting documentation to establish the origin of the Solid Waste.

Not less than sixty (60) days prior to January 1 of each calendar year, the County shall provide MWI with an estimate for the amount of non-hazardous Solid Waste it expects to be generated within the County and require disposal for that year. The estimate shall include a description of assumptions utilized and show calculations supporting the estimate. MWI shall reserve sufficient capacity to dispose the quantity of non-hazardous Solid Waste estimated by the County, provided that the estimated amount does not exceed the permitted capacity of the Landfill. The reservation of landfill capacity for the County’s Solid Waste shall not be cumulative, and should the estimated capacity not be utilized by the County during any calendar year, that capacity may be utilized for other than County Solid Waste.

The County reserves the right to increase its Annual Estimate by up to 50% at any time in any one year in the event of unforeseen circumstances, including but not limited to natural disasters such as tornadoes, which render its original estimate inadequate. During the operational life of the Landfill, the Annual Estimate shall not increase more than 4% per year. For years in which the Annual Estimate was increased due to the unforeseen circumstances described above, it shall be assumed for purposes of calculating the Annual Increase for such years of unforeseen circumstances that the Annual Increase was 4%. The reservation of disposal
capacity for the County’s Solid Waste shall not be cumulative, and should the estimated disposal capacity not be utilized by the County during any calendar year, the capacity may be utilized for other than County Solid Waste.

The County shall have 60 days from its notification in accordance with Section 18 of the proposed transfer in which to notify MWI that the County does not approve of the transfer.    A. A certified food service manager is present at all times the facility is in operation; or
   B. Employees involved in food operations receive a HACCP training exercise, in-service training on another food service sanitation area, or attend an educational conference on food safety or sanitation.

The completed inspection report is a public document that shall be made available for public disclosure to any person who requests it, according to law.

RISK CLASSIFICATIONS - for food service establishments or retail food stores shall be based upon the following classifications and criteria:

A. High Risk means that a facility presents a high relative risk of causing foodborne illness based on the large number of food handling operations typically implicated in foodborne outbreaks and/or the type of population served by the facility. The following criteria shall be used to classify high risk facilities:

A. Whenever cooling of potentially hazardous foods occurs as part of the food handling operations at the facility;

C. If potentially hazardous foods which have been previously cooked and cooled must be reheated;
D. When preparing potentially hazardous food for off premises service for which time-temperature requirements during transportation, holding and service are relevant;
E. Whenever complex preparation of foods, or extensive handling of raw ingredients with hand contact for ready-to-eat foods, occurs as part of the food handling operations at the facility;
F. If vacuum packaging and/or other forms of reduced oxygen packaging are performed at the retail level; or
G. Whenever serving immuno-compromised individuals. Where these individuals comprise the majority of the consuming population.

B. Medium Risk means that a facility presents a medium relative risk of causing foodborne illness based upon few food handling operations typically implicated in foodborne illness outbreaks. The following criteria shall be used to classify medium risk facilities:
A. If hot or cold foods are not maintained at that temperature for more than 12 hours and are restricted to same day service
B. If preparing foods for service from raw ingredients uses only minimal assembly; and
C. Foods served at an establishment that require complex preparation (whether canned, frozen or fresh prepared) are obtained from approved food processing plants, (high risk) food service establishments or retail food stores.

C. Low Risk means a facility presents a low relative risk of causing foodborne illness based upon few or no food handling operations typically implicated in foodborne illness outbreaks.
The following criteria shall be used to classify low risk facilities:

A. Only pre-packaged foods are available or served in the facility, and any potentially hazardous foods available are commercially pre-packaged in an approved food processing plant;

B. Only limited preparation of non-potentially hazardous foods and beverages, such as snack foods and carbonated beverages, occurs at the facility; or

C. Only beverages (alcoholic or non-alcoholic) are served at the facility.

The Health Authority may reclassify a facility based upon its experience with such facility if, in its opinion, a health hazard will not result from such reclassification or such reclassification will provide better protection for the public. Factors to be used when considering reclassification of a facility include inspection history, number and frequency of violations and their severity and corrective actions taken.

4-1-8 CORRECTION OF VIOLATIONS

A. The completed inspection report form shall specify a reasonable period of time for the correction of the violations found; correction of the violations shall be accomplished within the period specified, in accordance with the following provisions:

A. If an imminent health hazard exists, including but not limited to complete lack of refrigeration or sewage backup into the establishment, the establishment shall immediately cease food service or sales operations.

A follow-up inspection, as deemed necessary by the Health Authority, shall be conducted to confirm correction.

C. All 1- or 2-point weighted items shall be corrected as soon as possible, but in any event, by the time of the next routine inspection.

E. In the case of temporary food service establishments, all violations shall be corrected within 24 hours. If violations are not corrected within 24 hours, the establishment shall immediately cease food service operations until authorized to resume by the Health Authority.

B. Failure of the license holder or operator to comply with any time limits for corrections may result in cessation of food service operations. An opportunity for hearing on the inspection findings or the time limitations or both will be provided if a written request is filed with the Health Administrator within ten (10) days following cessation of operations. If a request for hearing is received, a hearing shall be held within twenty (20) days of receipt of the request.

C. Whenever a food service establishment or retail food store is required under the provisions of Section 8 above to cease operations, it shall not resume operations until it is shown on re-inspection that conditions responsible for the order to cease operations no longer exist. All expenses incurred by the Health Department shall be paid by the responsible owner or occupant of the subject property. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. The Health Department Administrator shall render a decision within ten (10) days after the date of the hearing which shall be reduced to writing and placed on file in the office of the Health Department, and a copy thereof shall be sent to the petitioner. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. If, as a result of the hearing, the Board of Health finds that strict compliance with the decision of the Health Department Administrator would cause undue hardship on the petitioner and that the public health would be adequately protected and substantial justice done by granting a variance from the decision of the Health Department Administrator, the Board of Health may grant a variance, and as a condition for such variance, may make requirements which are additional to those prescribed by this Ordinance, all for the purpose of properly protecting the public health. The Board of Health shall render a decision within ten (10) days after the date of the hearing which shall be reduced to writing and placed on file in the office of the Health Department, and a copy thereof shall be sent to the petitioner.

Every nuisance described in Section 4-2-3, upon conviction, may, by order of the court in that action, be abated by the Sheriff or other proper officer at the expense of the defendant. proceeding under this Section that the nuisance is erected or continued by virtue or permission of a law of this State.

Any person who violates any provision of Section 4-2-6.2 (Noxious Weeds) of this Ordinance shall be guilty of a Petty Offense and shall be fined not more than $100 for the first offense and not more than $200 for each subsequent offense.

4-2-14 SEPARABILITY OF PROVISIONS

If any section, subsection, paragraph, sentence, clause, or phrase of this Ordinance should be declared invalid for any reason whatsoever, such decision shall not affect the remaining portions of this Ordinance which shall remain in full force and effect and, to this end, the provisions of the Ordinance are hereby declared to be severable.
This Ordinance shall be in full force and effective immediately upon its adoption as provided by law. Previously adopted ordinances pertaining to the same subject matter are repealed.

for final approval prior to recording.

4-4-7 PRIVATE SEWAGE DISPOSAL PERMITS
Every private sewage disposal system or component thereof shall be
installed, constructed, extended, or repaired in Rock Island County in
accordance with this Ordinance, and it shall be unlawful to proceed
with such work unless a permit shall have first been obtained from
the Health Authority. However, the routine cleaning or pumping of
disposal system components, replacing tank access covers, adding
tank access risers, or rodding-out the building sewer or septic tank
inlet and outlet do not require a permit.

4-4-7.1 APPLICATION FOR PERMIT
Application for said permit shall be made in writing to the Health
Department in such form as prescribed by the Health Authority.
Each application shall include the property owner’s name,
identification of the subject property, and an accurate depiction of
the property lines and dimensions of the lot.
A detailed site plan shall show the type and location of the proposed private sewage disposal system components along with appropriate dimensions. In addition, all existing and proposed structures, driveways, patios, easements, and in-ground swimming pools shall be located and include dimensions and distances to property lines. The location of all existing and proposed wells, water lines, sewers, underground utility lines, irrigation systems, drainage tiles, waterways, lakes, ponds, rivers, streams, ravines, wooded areas, and other related entities shall also be shown along with appropriate separation distances from the proposed disposal system. Similar information as listed above shall be included for any neighboring property which may impact the location of the proposed disposal system. A soil investigation report, specific to the proposed disposal system area, shall also be included with the application. The soil investigation shall be done by a qualified soil classifier.

4-4-7.2 PERMIT FEE
Payment of the permit fee shall accompany each application. The appropriate fee is established by the Board of Health and is listed on the Health Department fee schedule. Once evaluation of the application has begun by the Health Authority, the permit fee is nonrefundable.

4-4-7.3 EVALUATION OF APPLICATION
Upon submission of the application for permit, including the site plan, the soil evaluation, and all necessary components, the Health Authority shall review said application prior to issuance of a permit. For an application involving renovation or repair of an existing disposal system, portions of the existing system to be retained shall comply with any provisions of this Ordinance deemed necessary by
the Health Authority. If the information provided is insufficient to
determine compliance with the Ordinance, the Health Authority
may require additional information, including more detailed soil or
engineering studies. It shall be the responsibility of the applicant or
an authorized agent of the applicant to obtain all requested data
and to design a system which shall meet the requirements of this
Ordinance.

Any application for a new installation or the extension or
replacement of a disposal system component utilizing a surface
discharging system for treated effluent that discharges pollutants to
a water of the United States must have coverage under a National
Pollutant Discharge Elimination System (NPDES) permit prior to
submitting a permit application to the Health Authority. Coverage
can be obtained under the United States Environmental Protection
Agency’s NPDES General Permit No. ILG62 or an individual permit
from the Illinois Environmental Protection Agency.

4-4-7.4 ISSUANCE OF PERMIT
If the Health Authority, upon review of said application, finds that
such application meets the requirements of this Ordinance, and
upon payment of the required fee, a permit shall be issued to the
applicant. Notwithstanding the above, a permit shall not be issued
to the owner-occupant of a single family residence who is acting as
the contractor unless the owner can demonstrate satisfactory
knowledge, skills, and equipment to properly construct or repair the
disposal system. This ability shall be demonstrated in a manner
prescribed by the Health Authority. An approved permit application
may include a statement by the Health Authority as to any
restrictions relating to the components, type, or size system to be
installed. The permit issued by the Health Authority shall be obtained
prior to issuance of a building permit by the county or a municipality.
4-4-7.5 RESPONSIBILITY FOR PERMIT
It shall be the responsibility of the private sewage disposal system installation contractor to ensure that a permit has been issued before any construction or repair has begun on any system and to follow the conditions of said permit. In the event that the property owner is installing or repairing the disposal system, it shall be the responsibility of the property owner to ensure that a permit has been issued before any construction or repair has begun and to follow the conditions of the permit. Failure to ensure that said permit has been issued or to violate the conditions of said permit shall constitute a violation of this Ordinance, and penalty action may be taken.

4-4-7.6 PERMIT VALIDITY
The permit to construct or repair is valid for a period of twelve (12) months from the date of issuance. If construction or repair has not started within this period, the permit is void.

4-4-8 SPECIAL EVALUATIONS
The Health Department may conduct special evaluations concerning the operation of existing private sewage disposal systems or the feasibility of construction of new private sewage disposal systems. The evaluation of existing systems is generally done for real estate transactions or mortgage refinancing. Special evaluations are conducted on a consultative basis upon the request of the property owner or authorized agent. Payment of a fee is required in order to conduct a special evaluation. The appropriate fee is established by the Board of Health and is listed on the Health Department fee schedule.

4-4-9 ADDITIONAL REQUIREMENTS
Addition requirements are as stated below.
4-4-9.1 DISPOSAL SYSTEM CONTAINED ON PROPERTY
All components of any private sewage disposal system shall be located on the same property as the building it serves. In cases where any or all portions of a private sewage disposal system is or must be located on another property due to site limitations, an easement agreement must be executed and recorded with the Recorder of Deeds. Such easement shall designate a defined area and completely contain any and all portions of the disposal system on the other parcel. Restrictions on activities and access for servicing or repairs within the easement area shall be included in the easement agreement. The easement shall extend for the life of the disposal system, and the agreement shall be transferrable to subsequent property owners. If a disposal system or any portion thereof must be located on another property or parcel that is owned by the same person as the building lot, a legal document, alternative to an easement, shall be executed and filed with the Recorder of Deeds. This document must either: 1) bind the two parcels to a common owner when either lot is sold in the future, or 2) require that an easement agreement be executed and recorded if each lot is proposed to have a separate owner. Either option must meet the same requirements as stated above for an easement agreement.

4-4-9.2 MINIMUM SUBSURFACE SEEPAGE FIELD SIZING
The minimum equivalent trench bottom absorption area for a subsurface seepage field system serving any dwelling or building shall be 300 square feet unless an alternative type private sewage disposal system is used.
4-4-9.3 PIPING UNDER DRIVEWAYS
Building sewer piping and treatment unit effluent piping which are located under driveways, parking lots, or other vehicular traffic areas shall be constructed of Schedule 40 PVC or stronger and encapsulated within a second pipe of equal or greater strength to prevent crushing and to improve insulation against freezing.

4-4-9.4 CHAMBER AND GRAVELLESS SEEPAGE FIELDS
When a chamber or gravelless subsurface seepage field system is to be installed, the installation contractor shall advise the property owner of this fact prior to construction. In addition, the installation contractor shall install one or more access ports within the seepage field system on each elevation to facilitate inspection and cleaning. The access ports shall have risers of at least four (4) inches in diameter and shall be extended to the finished ground surface or higher and terminated with removable caps.

4-4-9.5 AEROBIC TREATMENT UNITS
All aerobic treatment units (ATU’s) shall have in force, at all times, a service policy through: 1) either the manufacturer or distributor, or 2) the dealer, or 3) another person or agency qualified and duly licensed to perform the required semi-annual inspections and maintenance as well as additional necessary service for as long as the unit is in operation. A homeowner shall be permitted to perform inspection, maintenance, and service only if the owner can demonstrate the ability to properly perform and document the required tasks.

4-4-9.6 DISINFECTION
The effluent from any new, repaired, or replaced private sewage disposal system that is designed and approved to have a surface discharge point shall be disinfected prior to discharge.
The property owner or a person authorized by the property owner shall be responsible for assuring that a chlorine disinfection system has a constant supply of approved chlorine product at all times. For other approved disinfection processes or equipment, the property owner or authorized person shall assure that the disinfection device is operating properly.

4-4-10 INSPECTIONS
Subject to constitutional limitations, the Health Authority shall have the authority to enter any property or building at any reasonable time to inspect for sewage-related health and sanitation purposes to determine compliance with this Ordinance. It shall be the duty of the owner or occupant of a property to give the Health Authority free access to the property at reasonable times upon request of the Health Authority.

4-4-10.1 SAMPLE COLLECTION AND TESTING
The Health Authority shall be permitted to collect water or effluent samples or conduct any necessary tests, including dye tests, upon any property or any building thereon to determine compliance with the provisions of this Ordinance.

4-4-10.2 PRECOVER INSPECTION REQUIRED
The Health Authority shall be permitted to inspect the installation of a private sewage disposal system at any stage of construction. Before backfilling is started, but after complete installation of the disposal system or portion thereof, an inspection shall be made by the Health Authority to determine compliance with the provisions of this Ordinance. Any person who shall backfill or cover any portion of a
private sewage disposal system without authorization by the Health Authority shall be in violation of this Ordinance. In such case, the Health Authority may require the uncovering of the covered portion, and all costs incurred by such action shall be the responsibility of the violator. The permit holder or installer shall provide advance notice of at least one working day to the Health Department for a precaver inspection.

4-4-10.3 APPROVAL OF INSTALLATION
If the Health Authority, upon inspection, finds that the specified work meets the requirements of this Ordinance, the Health Authority shall approve the installation, complete the inspection report form, and authorize backfilling to be done.

4-4-11 SUSPENSION OR REVOCATION OF PERMIT
Upon inspection by the Health Authority, if it is found that the permit holder or installer has violated any provisions of this Ordinance, the Health Authority shall notify the owner or installer to make such specified changes in the work to allow compliance with this Ordinance. If such changes are not made within a reasonable time as set forth by the Health Authority, said permit may then be suspended or revoked by the Health Authority, and it shall be unlawful to use such private sewage disposal system. A permit may also be suspended or revoked when a permit application is later found to be inaccurate.

4-4-12: UNSANITARY CONDITIONS
Each private sewage disposal system shall be maintained in sanitary condition and repair by the property owner. It shall be unlawful for
any person to permit or cause human waste, raw or improperly treated domestic sewage, or the effluent from septic tanks, septic system seepage fields, or other component of a private sewage disposal system that has not been subjected to approved sewage treatment and disposal, to be discharged, directly or indirectly, onto the ground surface, into any stream, ditch, river, pond, lake, any collector of water, farm tile, well, cistern, basement, cave, tunnel, sinkhole, or mine shaft, or to allow the contents of any privy, vault, septic tank, cesspool, or any other part of a private sewage disposal system to emit offensive odors or become dangerous or prejudicial to health, and all such acts or omissions are hereby declared violations of this Ordinance.

4-4-13.1 EXCEPTIONS
Said license shall not be required of a resident property owner who may personally perform the aforementioned work on the owner’s single family residence; this does not apply to builders of speculative homes. However, such exception does not relieve the property owner from obtaining a permit to install and from complying with the other requirements of this Ordinance.

All containers shall be: 1) of rigid design, 2) corrosion resistant, 3) constructed of metal or plastic, and 4) leak-proof and fly-proof with tight-fitting lids and handles at the sides. All hand-emptied containers shall have a capacity of at least twenty (20) gallons but
shall not exceed a capacity of thirty (30) gallons. Plastic bags shall not be accepted for the storage and collection of refuse except as provided in Section 4-5-5.2 of this Ordinance.

4-5-5.2 Use of Plastic Bags

The use of plastic bags for refuse storage and collection shall only be permitted if such bagged and sealed refuse is stored within a relatively fly-proof or vermin-proof location such as a shed, garage, other out-building or within the dwelling. Only bags specifically designed for refuse storage which are leak proof and relatively strong shall be permitted. Bags filled with refuse shall be tied and shall be placed in the out-of-doors only on the date of collection as close to the time of pick-up as practical. The use of plastic bags for refuse storage and collection shall only be permitted for a single family dwelling or duplex building.

4-5-5.3 Refuse Containers for Apartments or Larger Businesses

The owner or agent of any apartment building or larger business where eight (8) or more twenty (20) gallon refuse containers are provided or needed shall provide container(s) of one (1) cubic yard capacity or larger. A sufficient amount of total refuse storage capacity shall be provided to accommodate all refuse generated between regular collection dates. Such large containers shall be: 1) stable while loaded or empty, 2) equipped with lids with hinges or sliding doors, 3) equipped for mechanical
dumping, 4) durable, 5) leak-proof and relatively fly and vermin-proof, and 6) maintained in good repair.

4-5-5.4 Removal of Covers and Cleaning of Refuse Containers

The covers of refuse containers shall be removed or opened only for the purpose of depositing or collecting refuse. Containers shall be maintained in a clean and sanitary condition. All such containers shall be cleaned as often as necessary to minimize the attraction of flies, vermin, or other animals or the creation of unsanitary conditions or offensive odors. Refuse containers may be cleaned by scrubbing with detergent and water or by pressure washing. If cleaning is done on the premises, the debris and residue generated from container cleaning shall be collected and disposed of in a proper manner. Large, mechanically dumped containers shall be cleaned at a properly designed and operated facility. In all cleaning of large mechanically dumped refuse containers, cleaning solutions, washings, and residue shall be collected and disposed of in a proper manner.

4-5-6 TRANSPORTATION OF REFUSE

No person shall transport or cause to be transported within Rock Island County, Illinois, any refuse except within a closed or covered container or specially constructed conveyance approved by the Health Authority. Exceptions to this Section may be granted by the Health Authority such as for transportation of certain types of refuse which will not present a health or safety hazard or create littering of properties and roadways.

4-5-7 REFUSE HAULER’S LICENSE REQUIRED
No person, except as provided in Section 4-5-7.1 of this Ordinance, shall conduct a refuse collection, transport, or disposal business in Rock Island County unless such person possesses a valid Rock Island County Refuse Hauler’s License issued by the Health Department.

4-5-7.1 Exceptions

A Rock Island County Refuse Hauler’s License shall not be required of a property owner or tenant who may personally remove refuse generated on such single-family property. However, such exception does not relieve the property owner or tenant from complying with the other requirements of this Ordinance. Nor shall said license be required of a public or municipal refuse hauling business operating in Rock Island County.

4-5-7.2 Application for License

Application for a Rock Island County Refuse Hauler’s License shall be in writing and in such form as prescribed by the Health Department. As part of the review process, the Health Authority shall be permitted to inspect all applicable vehicles and equipment utilized by the applicant.

4-5-7.3 Performance Standards

The following standards for applicable vehicles, facilities, or equipment shall be met on an ongoing basis by holders or applicants of a Rock Island County Refuse Hauler’s License.

A. Each refuse hauling vehicle shall be in good mechanical condition.
B. Each refuse hauling vehicle shall be maintained in a safe, clean, and sanitary condition, and shall be constructed, maintained, and operated to prevent spillage of solid waste and/or liquid waste. Each refuse hauling vehicle shall be constructed with a watertight body and cover which shall be an integral part of the vehicle, or under conditions approved by the Health Authority, there shall be a separate cover or tarp of suitable material with fasteners or a closing mechanism designed to secure all sides of the cover to the vehicle. Such cover shall be secured in place whenever the vehicle is transporting refuse. For refuse haulers with a regular collection route, only an enclosed packer type vehicle shall be permitted. No refuse shall be transported in the loading hopper, if so equipped.

C. Overnight parking of a loaded refuse hauling vehicle on public or private property is prohibited.

D. A shovel and broom shall be kept on each refuse hauling vehicle for the purpose of cleaning up spillage.

E. Each refuse hauling vehicle or container transported to any location of use shall be properly identified with the operator’s business name and of adequate letter size so as to be distinguishable at a reasonable distance. Letters shall not be less than four (4) inches high.

F. Containers furnished to customers shall comply with the requirements set forth in Section 4-5-5.3.

G. Current lists of customers and vehicle routes shall be supplied to the Health Authority upon request.

H. Licensed refuse haulers must comply with all applicable ordinances and laws of Rock Island County and the State of Illinois regarding the operation of their business.
I. Proof of ownership or of lease of a vehicle or vehicles shall be provided at the time of inspection.

J. When a complaint is received regarding noise created by the operation of refuse collection vehicles and/or crews, the Health Authority may, upon review of the complaint, set the hours of collection so that the noise does not unduly disturb the neighborhood.

K. Licensed refuse haulers shall be responsive to inquiries or requests from the Health Department regarding their collection practices, nonpick-up or littering complaints, the condition of containers, and payment by customers. In such cases, the refuse hauler shall take prompt corrective action as deemed necessary by the Health Authority.

4-5-7.4 Issuance of License

Upon receipt of the required application, the Health Authority shall review: 1) information provided on the application, and 2) the applicant’s work record with respect to previous compliance with provisions of this Ordinance (if applicable), and 3) other pertinent information regarding qualifications, experience, and equipment as deemed necessary by the Health Authority. In addition, the Health Authority shall inspect each applicable vehicle, facility, or piece of equipment to ascertain whether the applicable Performance Standards of Section 4-5-7.3 are being met. Inspections shall be conducted at mutually agreed upon times and locations. If the Health Authority, after such review and inspections, determines that the applicant has the proper qualifications and equipment and has previously operated in compliance with the provisions of this Ordinance (if applicable), and upon payment of the required fee, a license shall be issued to the applicant.
Licenses are issued annually and shall expire November 30th of each year.

4-5-7.5 License Fee

Payment of the license fee shall accompany each application. The appropriate fee is established by the Board of Health and is listed on the Health Department fee schedule.

4-5-8 COMPLIANCE CONFERENCES

In cases where the applicant or licensee has violated provisions of this Ordinance, most particularly Section 4-5-7.3, the Health Department Administrator has the authority to compel the applicant or licensee to attend a compliance conference at the Health Department. The purpose of this informal conference is to discuss specified violations by the applicant or licensee and to reach an agreed upon resolution to allow issuance or continuation of a Rock Island County Refuse Hauler’s License. No enforcement action will be taken at a compliance conference. A compliance conference is conducted at the option of the Health Department Administrator. This option does not preclude the Health Department Administrator from taking action as provided in Section 4-5-9 of this Ordinance.

4-5-9 SUSPENSION OR REVOCATION OF REFUSE HAULER’S LICENSE

Whenever a holder of a Rock Island County Refuse Hauler’s License has failed to comply with any part of this Ordinance, the Health Authority may give a written notice to request compliance within a specified time. Upon failure by the license holder to comply with such notice in the time prescribed, the license may be suspended or revoked after an opportunity for a hearing has been provided by the Health Department Administrator. Prior to such action, the Health Department Administrator shall notify the operator in writing, stating...
the reason for which the license shall be suspended or revoked at the end of five (5) days following service of such notice unless a request for a hearing is filed with the Health Department Administrator by the license holder within such five (5) day period. However, said license may be suspended without warning, notice, or hearing by the Health Authority if the licensee’s actions pose a substantial hazard to the public health.

4-5-10 INSPECTIONS

Subject to constitutional limitations, the Health Authority shall have the authority to enter any property or inspect any applicable facilities at any reasonable time for health and sanitation purposes to determine compliance with the provisions of this Ordinance. It shall be the duty of the owner or occupant of a property to give the Health Authority free access to the property at reasonable times upon request of the Health Authority.

4-5-11 NOTICE OF VIOLATION

Whenever the Health Authority determines, through inspections or other means, that there is a violation of any provision of this Ordinance, the Health Authority shall give notice of such alleged violation. Such notice shall:

1. Be in writing.
2. Include a statement of the reasons for the issuance of the notice.
3. Contain an outline of remedial action and allow a reasonable time to effect compliance with this Ordinance.
4. Be served upon the owner, operator, or resident as the case may require, provided that such notice shall be deemed to have been properly served when the notice has been personally delivered or sent by registered or
certified mail or if the owner, operator, or resident acknowledges receipt of such notice.

4-5-12 HEARING BEFORE THE HEALTH DEPARTMENT ADMINISTRATOR

Any person affected by any order or notice issued by the Health Department in connection with the enforcement of any section of this Ordinance may file in the office of the Health Department a written request for a hearing before the Health Department Administrator. The Health Department Administrator shall hold a hearing at a time and place designated by him/her within thirty (30) days from the date on which the written request was filed. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. If, as a result of the hearing, the Health Department Administrator finds that strict compliance with the order or notice would cause undue hardship on the petitioner and that the public health would be adequately protected and substantial justice done by varying or withdrawing the order or notice, the Health Department Administrator may modify or withdraw the order or notice, and as a condition for such action may make requirements which are additional to those prescribed in this Ordinance for the purpose of properly protecting the public health. The Health Department Administrator shall render a decision within ten (10) days after the date of the hearing which shall be reduced to writing and placed on file in the office of the Health Department, and a copy thereof shall be sent to the petitioner. Any person aggrieved by the decision of the Health Department Administrator may seek relief therefrom through a hearing before the Board of Health.

4-5-13 HEARING BEFORE THE BOARD OF HEALTH

Any person aggrieved by the decision of the Health Department Administrator, rendered as the result of a hearing held in
accordance with Section 4-4-12, may file in the office of the Health Department a written request for a hearing at the next regular Board of Health meeting, if the agenda allows. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. If, as a result of the hearing, the Board of Health finds that strict compliance with the decision of the Health Department Administrator would cause undue hardship on the petitioner and that the public health would be adequately protected and substantial justice done by granting a variance from the decision of the Health Department Administrator, the Board of Health may grant a variance, and as a condition for such variance, may make requirements which are additional to those prescribed by this Ordinance, all for the purpose of properly protecting the public health. The Board of Health shall render a decision within ten (10) days after the date of the hearing which shall be reduced to writing and placed on file in the office of the Health Department, and a copy thereof shall be sent to the petitioner.

4-5-14 PENALTIES

Any person who violates any provisions of this Ordinance shall be guilty of a Petty Offense and shall be fined not more than $1,000. Each day’s violation constitutes a separate offense.

4-5-15 INJUNCTIONS

The State’s Attorney of Rock Island County may bring action for an injunction to restrain any violation of this Ordinance or to enjoin the operations of any such establishment causing such violation.

4-5-16 CONFLICT OF ORDINANCE

In any case where a provision of this Ordinance is found to be in conflict with a provision of any zoning, building, fire, safety, or health
ordinance or code of Rock Island County existing on the effective date of this Ordinance, the provision which, in the judgment of the Health Authority, establishes the higher standard for the promotion and protection of the health and safety of the people shall be deemed to prevail, and such other ordinance or codes are hereby declared to be repealed to the extent that they may be found in conflict of this Ordinance.

4-5-17 SEPARABILITY OF PROVISIONS

If any section, subsection, paragraph, sentence, clause, or phrase of this Ordinance should be declared invalid for any reason whatsoever, such decision shall not affect the remaining portions of this Ordinance which shall remain in full force and effect and, to this end, the provisions of the Ordinance are hereby declared to be severable.
4-5-18  EFFECTIVE DATE

This Ordinance shall be in full force and effective immediately upon its adoption as provided by law. Previously adopted ordinances pertaining to the same subject are repealed.

4-9-1 SCOPE

An Ordinance regulating water wells and closed loop wells, the construction, modification, sealing, and inspection of such wells and their components, and the regulation of non-community public water supplies within Rock Island County, Illinois.

WHEREAS, the Board of Health of the Rock Island County Department of Public Health has deemed it necessary and desirable to regulate water supplies and closed loop well systems for health purposes and groundwater protection, and accordingly has recommended adoption of the following Ordinance.
THEREFORE, BE IT RESOLVED by the County Board of Rock Island County, Illinois, that the following Ordinance is hereby made and adopted this _____ day of ______________, 2016.

4-9-2 DEFINITIONS

The following definitions shall apply in the interpretation and enforcement of this Ordinance:

1. **ABANDONED WELL** means a water well or monitoring well which is: 1) no longer used to supply water, or 2) no longer in use for the purpose for which it was intended, or 3) in such a state of deficient construction or disrepair that the well or boring has the potential for transmitting contaminants into an aquifer or otherwise threatens the public health or safety.

2. **CLOSED LOOP WELL** means a sealed, watertight loop of pipe buried outside of a building foundation intended to re-circulate a liquid solution through a heat exchanger but is limited to the construction of the borehole, piping in the borehole, heat exchanger fluid, and the grouting of the borehole and does not include the piping and appurtenances used in any other capacity. “Closed loop well” does not include any horizontal closed loop well systems where grouting is not necessary by law or standard industry practice. Closed loop wells are also commonly known as geothermal wells.

3. **CLOSED LOOP WELL SYSTEM** means a clustered group of closed loop wells that serve the same facility.

4. **COMMUNITY PUBLIC WATER SYSTEM** means a public water system which serves at least 15 service connections used by residents, or regularly serves 25 or more residents for at least 60 days per year.

5. **DRIVEN WATER WELL** means a well constructed by joining a drive point with lengths of pipe and then driving or jetting the assembly into the ground with percussion equipment or by hand. Driven water wells are also commonly known as sandpoint wells.

6. **HEALTH AUTHORITY** means that person or persons designated by the Rock Island County Board of Health to enforce this Ordinance.

7. **HEALTH DEPARTMENT** means the Rock Island County Department of Public Health, including its duly authorized representatives.

8. **HEALTH DEPARTMENT ADMINISTRATOR** means the individual selected by the Rock Island County Board of Health to administer and enforce the policies, ordinances, resolutions, and laws of said Board.

9. **HORIZONTAL CLOSED LOOP WELL SYSTEM** means any open cut excavation
where a watertight loop of pipe is buried outside of a building foundation that is intended to re-circulate a liquid solution through a heat exchanger.

10. LAWNSPRINKLER SYSTEM means any irrigation system of lawn, shrubbery, and other vegetation from all water sources, whether potable or non-potable. Such system includes without limitation the water supply piping, valves, and sprinkler heads or other irrigation outlets. Lawn sprinkler system does not include an irrigation system used primarily for agricultural purposes.

11. MODIFICATION means the alteration of the structure of an existing water well, including, but not limited to, deepening, installation of a pitless adapter, elimination of a buried suction line, installation of a liner, replacing, repairing or extending casing, or replacement of a well screen. Pertaining to closed loop wells, "modification" also means any alteration to the construction of the borehole of an existing closed loop well, including, but not limited to, regrouting and installation of additional boreholes.

12. MONITORING WELL means a water well intended for the purpose of determining groundwater quality or quantity.

13. NON-COMMUNITY PUBLIC WATER SYSTEM means a public water system which is not a community water system, and has at least 15 service connections used by non-residents, or regularly serves 25 or more non-resident individuals daily for at least 60 days per year.

14. NON-POTABLE WATER means water that does not meet public health standards for drinking water and is not suitable for human consumption or culinary use, or is of unknown quality. Examples of situations where non-potable water sources may be used include commercial or industrial processing or cooling, irrigation of agricultural ground, or irrigation of other vegetated areas with or without use of a lawn sprinkler system.

15. POTABLE WATER means water that is generally fit for human consumption in accordance with accepted water supply principles and practices.

16. PRIVATE WATER SYSTEM means any supply which provides water for drinking, culinary, and sanitary purposes and serves an owner-occupied single family dwelling.

17. SEMI-PRIVATE WATER SYSTEM means a water supply which is not a public water system, yet which serves a segment of the public other than an owner-occupied single family dwelling.

18. WATER WELL means any excavation that is drilled, cored, bored, washed, driven, dug, jetted or otherwise constructed when the intended use of such excavation is for the location, diversion, artificial recharge, or acquisition of groundwater.
4-9-3 ADOPTION BY REFERENCE

In addition to those provisions set forth, this Ordinance shall be interpreted and enforced in accordance with provisions set forth in the following statutes, rules, and regulations of the State of Illinois, Department of Public Health and any subsequent amendments or revisions thereto, which publications are incorporated herein and adopted by reference as part of this Ordinance.

1. Illinois Water Well Construction Code (77 Ill. Adm. Code 920)
5. Surface Source Water Treatment Code (77 Ill. Adm. Code 930)
7. Illinois Groundwater Protection Act (415 ILCS 55)
8. Water Well and Pump Installation Contractor’s License Act (225 ILCS 345)
9. Illinois Water Well Construction Code (415 ILCS 30)
10. Illinois Water Well Pump Installation Code (415 ILCS 35)

One copy of each of the above rules and regulations shall be on file in the office of the Rock Island County Clerk.

4-9-4 PUBLIC WATER SUPPLY USE

In those locations where a public water supply is reasonably available, that supply shall be the sole source of water for drinking and culinary purposes. A public water supply shall be deemed reasonably available when the subject property is located within 200 feet of the public water supply to which connection is practical and is permitted by the controlling authority for said water supply.

4-9-5 POTABLE WATER SUPPLY REQUIRED

All premises intended for human habitation or occupancy shall be provided with a potable water supply. The potable water supply shall not be connected to non-potable water and shall be protected against backflow in accordance with the requirements of the Illinois Plumbing Code. Each potable water supply shall provide quantities of water that are sufficient for the drinking, culinary and sanitary needs of the dwelling or premises served. A minimum system pressure of 20 pounds per square inch shall be maintained throughout each potable water supply. Any premises intended for human habitation or occupancy which do not possess a potable water supply or provide sufficient pressure and quantities of water may be declared as unsafe or unfit for human occupancy and may be
so tagged by the Health Authority. Any such facility that has been tagged as unsafe or unfit for human occupancy shall be vacated within the time limit specified by the Health Authority.

4-9-5.1 SURFACE WATER SUPPLIES

All water systems which receive their source of water from ponds, lakes, streams, rivers, or other surface collectors shall be designed, constructed and operated in accordance with the Surface Source Water Treatment Code. No surface water shall be utilized as a potable water supply unless the Health Authority has reviewed and approved the supply and its components.

4-9-5.2 CISTERNs

Cisterns shall not be used as a potable water supply except where adequate groundwater resources are not available. Cistern water shall receive treatment in accordance with the Surface Source Water Treatment Code. No surface water shall be utilized as a potable water supply unless the Health Authority has reviewed and approved the supply and its components.

4-9-5.3 PRE-EXISTING WATER WELLS

All water wells constructed prior to the effective date of this Ordinance shall comply with any provisions of this Ordinance deemed necessary by the Health Authority to protect groundwater and the public health. After the effective date of this Ordinance, whenever a water well is constructed or a new water source is obtained on a property, any pre-existing water wells located on said property shall be: 1) in substantial compliance with construction and/or location provisions contained within this Ordinance, or 2) renovated in order to be in substantial compliance with construction provisions contained within this Ordinance, or 3) sealed in accordance with provisions contained within this Ordinance.

4-9-5.4 BACKFLOW PROTECTION

Where water wells are utilized to act as a non-potable water source, the groundwater supplying such wells shall be protected against backflow. Each water outlet shall be protected from backflow by having the outlet end from which the water flows spaced a distance above the flood-level rim of the receptacle or body of water into which the water flows sufficient to provide a
minimum fixed air gap. The size of the air gap shall be as specified in the Illinois Plumbing Code as it applies to the protection of potable water. Where it is not possible to provide a minimum fixed air gap, the water outlet shall be equipped with an accessible backflow prevention device (e.g. a vacuum breaker or backflow preventer) complying with either: 1) applicable standards of the Illinois Plumbing Code as it applies to the protection of potable water, or 2) applicable standards of the Illinois Water Well Pump Installation Code for agricultural irrigation as it applies to chemical injection systems. When there is question as to which type of protection device shall be utilized in a given situation, the higher standard of protection shall apply as determined by the Health Authority.

4-9-6   SEALING OF ABANDONED WATER WELLS AND CLOSED LOOP WELLS

Water wells and closed loop wells that are abandoned shall be sealed in a manner prescribed by the Health Authority and the Illinois Water Well Construction Code. In questionable cases, the Health Authority shall make the determination as to whether a water well is considered abandoned, based upon the definition of an abandoned well in each particular case.

4-9-6.1 Permit Required

No water well or closed loop well shall be sealed within Rock Island County unless a permit has been obtained in advance from the Health Authority. An application to seal a water well or closed loop well shall be submitted to the Health Authority on forms prescribed by the Health Department. Upon submission of the application for permit, the Health Authority shall review said application prior to issuance of a permit. If the Health Authority, upon review of said application, finds that such application meets the requirements of this Ordinance, and upon payment of the required fee, a permit shall be issued to the applicant. A sealing permit shall be valid for a period of twelve (12) months from the date of issuance.

4-9-6.2 Inspections

The person responsible for sealing an abandoned water well or closed loop well shall also be responsible for arranging a date and time for inspection of the well sealing in progress by the Health Authority. This inspection shall be scheduled subject to notification procedures set forth in Section 4-9-8.2 of this Ordinance and the availability of the Health Authority inspection staff. The Health
Authority, at its discretion, may waive the inspection requirement based upon the type of well to be sealed and the availability of the Health Authority inspection staff. In cases when the Health Authority waives the in progress inspection requirement, the person sealing the well shall submit a site drawing which depicts the specific location of the sealed well using measurements and landmarks.

4-9-6.3 Permit Fee

A permit fee shall be required to seal a water well or a closed loop well system. Payment of the appropriate permit fee shall accompany each application. The appropriate fee is established by the Board of Health and is listed on the Health Department fee schedule.

4-9-7 CONSTRUCTION OF WATER WELLS AND CLOSED LOOP WELL SYSTEMS

Water wells and closed loop well systems shall be constructed in a manner prescribed by the Health Authority and the Illinois Water Well Construction Code.

4-9-7.1 Permit Required

No water well or closed loop well system shall be constructed or modified within Rock Island County unless a permit has been obtained in advance from the Health Authority. Failure by a person to obtain such permit or insure said permit has been obtained shall constitute a violation of this Ordinance, and penalty action may be taken.

4-9-7.2 Application for Permit

An application to construct or modify a water well or closed loop well system shall be made in writing and in such a form as prescribed by the Health Authority. All applications shall include a plan and detailed drawing of the proposed construction and shall identify all sources of contamination. The Health Authority may require additional information, which may include determining the location of potential sources of contamination and/or water wells on adjacent properties. It shall be the responsibility of the applicant or an authorized agent to obtain and submit all necessary data as part of the application.
4-9-7.3 Issuance of Permit

Upon submission of the application for permit, the Health Authority shall review said application prior to issuance of a permit. After review, if the Health Authority finds that such application meets the requirements of this Ordinance, and upon payment of all required fees, a permit shall be issued. The Health Authority shall include a statement on the approved application regarding any conditions or restrictions to be imposed relating to location, materials, or components.

4-9-7.4 Permit Validity

A permit to construct or modify a water well or closed loop well system is valid for a period of twelve (12) months from the date of issuance. If construction has not started within this period, the permit shall be void.

4-9-7.5 Permit Fee and Inspection/Sampling Fee

A permit fee and an inspection/sampling fee shall be required for a water well permit. A closed loop well system permit fee shall also be required; such fee shall be based upon the number of boreholes drilled. The permit fee and inspection/sampling fee, if applicable, shall accompany each permit application. The appropriate fee is established by the Board of Health and is listed on the Health Department fee schedule.

4-9-7.6 Exception

A permit to construct or modify a water well in Rock Island County shall not be required by the Health Authority when such water well does or will serve a community public water system or function as a monitoring well.

4-9-8 INSPECTIONS

Subject to constitutional limitations, the Health Authority shall have the authority to enter any property or inspect any applicable facilities at any reasonable time for public health purposes to determine compliance with the provisions of this Ordinance. It shall be the duty of the owner or occupant of a property to give the Health Authority free access to the property at reasonable times upon the request of the Health Authority.
4-9-8.1 Inspection of Completed Work

Work done under a permit shall not be considered approved until the construction or modification of a water well or closed loop well system and its components have been inspected to verify compliance with the applicable provisions of this Ordinance. To the degree practical and permitted by the Health Authority, the completed installation shall remain uncovered and/or accessible for inspection purposes until approved by the Health Authority. If the Health Authority, upon inspection of the specified installation or component thereof, finds that such work meets the provisions of this Ordinance, the Health Authority shall approve such work. However, compliance with Section 4-9-9 shall be obtained prior to utilizing a potable water well system for drinking and culinary purposes.

4-9-8.2 Notification for Inspection

Any person who constructs, modifies, or seals a water well or closed loop well shall notify the Health Authority at least two (2) working days prior to commencement of the work.

4-9-8.3 Suspension of Permit

Upon inspection by the Health Authority, if it is found that any provisions of this Ordinance or any permit specifications for a stated property have been violated, the Health Authority shall notify the contractor or person responsible for the work to make such specified changes in the work to achieve compliance. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. If, as a result of the hearing, the Health Department Administrator finds that strict compliance with the order or notice would cause undue hardship on the petitioner and that the public health would be adequately protected and substantial justice done by varying or withdrawing the order or notice, the Health Department Administrator may modify or withdraw the order or notice, and as a condition for such action may make requirements which are additional to those prescribed in this Ordinance for the purpose of properly protecting the public health. The Health Department Administrator shall render a decision within ten (10) days after the date of the hearing which shall be reduced to writing and placed on file in the office of the Health Department, and a copy thereof shall be sent to the petitioner. Any person aggrieved by the decision of the Health Department Administrator may seek relief therefrom through a hearing before the Board of Health.

Any person aggrieved by the decision of the Health Department Administrator, rendered as the result of a hearing held in accordance with Section 4-9-12, may
file in the office of the Health Department a written request for a hearing at the next regular Board of Health meeting, if the agenda allows. The petitioner for the hearing shall be notified of the time and place of the hearing not less than five (5) days prior to the date on which the hearing is to be held. If, as a result of the hearing, the Board of Health finds that strict compliance with the decision of the Health Department Administrator would cause undue hardship on the petitioner and that the public health would be adequately protected and that substantial justice done by granting a variance from the decision of the Health Department Administrator, the Board of Health may grant a variance, and as a condition for such variance, may make requirements which are additional to those prescribed by this Ordinance, all for the purpose of properly protecting the public health. 5-1-1 GENERAL PROVISIONS:

5-1-1.1 SHORT TITLE

This article shall be known and cited as the “Animal Control Ordinance”.

5-1-1.2 POLICY AND PURPOSE

It has been found by the Rock Island County Board of Health and Rock Island County Animal Care & Control, that animals that are not controlled by responsible owners become a hazard to the safety and health of persons. It has also been established that rabies could be present in wildlife in Rock Island County and that rabies vaccination of dog and cat pets is an important barrier to preventing an epidemic of the disease in pets and thereby preventing a potential disease problem in the susceptible population of the County.
Registration provides an important means of identifying owners of biting animals and thereby establishes responsibilities for ten (10) day quarantines. The registration fees and fines provide money to pay the costs of effectuating the Animal Care and Control Program in the County.

The purpose of this ordinance is to provide harmonious relations in the interaction between person and animal by:

5-1-1.2.1 Protecting the citizens of Rock Island County from rabies by specifying such prevention and control measures as may be necessary.

5-1-1.2.2 Providing security to residents from annoyance, intimidation and injury from dogs or other animals.

5-1-1.2.3 Encouraging responsible pet ownership through education.

5-1-1.2.4 Protecting animals from improper use, abuse, neglect, inhumane treatment and health hazards, particularly rabies.

5-1-1.2.5 Providing for the assessment of penalties for violations and for the enforcement and administration of this Ordinance; the State of Illinois Animal Control Act; Humane Care for Animals Act; Animal Welfare Act; and the State and Federal Wildlife Codes.

5-1-1.3 SCOPE

This article shall include the following provisions:

5-1-1.3.1 Duties of the owners to vaccinate dogs and cats in their custody against rabies and to register said dogs and cats with Rock Island County Animal Care & Control.

5-1-1.3.2 Provisions for impoundment or confinement of biting animals.

5-1-1.3.3 Duties of owners to responsibly control all domestic animals in their custody.
5-1-1.3.4 Duties of owners to treat humanely all domestic animals in their custody.

5-1-1.3.5 Provisions for penalties to persons who violate this Ordinance; the Illinois State Animal Control Act; Humane Care of Animals Act; Animal Welfare Act; or State or Federal Wildlife Code.

5-1-1.4 PET POPULATION CONTROL FUND

5-1-1.4.1 A County Animal Pet Population Control Fund is established and funded by $10 of the annual unaltered pet registration. This fund shall be used to spay or neuter animals: 510 ILCS 5/3.

(a) placed for adoption by the Rock Island County Animal Care & Control facility

5-1-6.1 In order to have a dog deemed "vicious", the Administrator, Deputy Administrator, or law enforcement officer must give notice of the infraction that is the basis of the investigation to the owner, conduct a thorough investigation, interview any witnesses, including the owner, gather any existing medical records, veterinary medical records, or behavioral evidence, and make a detailed report recommending a finding that the dog is a vicious dog and give the report to the States Attorney’s office and the owner. The Administrator, State’s Attorney, Director or any citizen of the county in which the dog exists may file a complaint in the circuit court in the name of the People of the State of Illinois to deem a dog to be a vicious dog. Testimony of a certified applied behaviorist, a board certified veterinary behaviorist, or another recognized expert may be relevant to the court’s determination of whether the dog’s behavior was justified. The petitioner must prove the dog is a vicious dog by clear and convincing evidence. The Administrator shall determine where the animal shall be confined during the pendency of the case.
5-1-6.2 A dog may not be declared vicious if the court determines the conduct of the dog was justified because:

5-1-6.2.1 The threat, injury, or death was sustained by a person who at the time was committing a crime or offense upon the owner or custodian of the dog, or was committing a willful trespass or other tort upon the premises or property owned or occupied by the owner of the animal;

5-1-6.2.2 The injured, threatened, or killed person was abusing, assaulting, or physically threatening the dog or its offspring, or has in the past abused, assaulted, or physically threatened the dog or its offspring;

5-1-6.2.3 The dog was responding to pain or injury, or was protecting itself, its owner, custodian, or member of its household, kennel or offspring.

5-1-6.2.4 No dog shall be deemed “vicious” if it is a professionally trained dog for law enforcement or guard duties. Vicious dogs shall not be classified in the manner that is specific as to breed.

5-1-6.3 If the burden of proof has been met, the court shall deem the dog to be a vicious dog.

5-1-6.4 If the dog is found to be a vicious dog, the owner shall pay a $100 public safety fine to be deposited into the Pet Population Control Fund, the dog shall be spayed or neutered within 10 days of the finding at the expense of its owner and microchipped, if not already, and the dog is subject to enclosure.

5-1-6.5 If an owner fails to comply with these requirements, the animal control agency shall impound the dog and the owner shall pay a $500 fine plus impoundment fees to the animal control agency impounding the dog. The judge has the discretion to order a vicious dog be euthanized.
5-1-6.6 A dog found to be a vicious dog shall not be released to the owner until the Administrator, an Animal Control Warden, or the Director approves the enclosure. No owner or keeper of a vicious dog shall sell or give away the dog without approval from the Administrator or court. Whenever an owner of a vicious dog relocates, he or she shall notify both the Administrator of county Animal Control where he or she has relocated and the Administrator of County Animal Control where he or she formerly resided.

5-1-6.7 Any dog which has been found to be a vicious dog and which is not confined to an enclosure shall be impounded by the Administrator, an Animal Control Warden, or the law enforcement authority having jurisdiction in such area.

5-1-6.8 If the owner of the dog has not appealed the impoundment order to the circuit court in the county in which the animal was impounded within 15 working days, the dog may be euthanized.

5-1-6.9 Upon filing a notice of appeal, the order of euthanasia shall be automatically stayed pending the outcome of the appeal. The owner shall bear the burden of timely notification to animal control in writing.

5-1-6.10 Guide dogs for the blind or hearing impaired, support dogs for the physically handicapped, and sentry, guard, or police-owned dogs are exempt from this Section; provided, an attack or injury to a person occurs while the dog is performing duties as expected. To qualify for exemption under this Section, each such dog shall be currently inoculated against rabies in accordance with Section 3 of this ordinance and 510 ILCS 5/8. It shall be the duty of the owner of such exempted dog to notify the Administrator of changes of address. In the case of a sentry or guard dog, the owner shall keep the Administrator advised of the location where such dog will be stationed. The Administrator shall provide police and fire departments with a categorized list of such exempted dogs, and shall promptly
notify such departments of any address changes reported to
him.

5-1-6.11 If the animal control agency has custody of the dog, the agency
may file a petition with the court requesting that the owner be
ordered to post security. The security must be in an amount
sufficient to secure payment of all reasonable expenses
expected to be incurred by the animal control agency or animal
shelter in caring for and providing for the dog pending the
determination. Reasonable expenses include but are not limited
to, estimated medical care and boarding of the animal for 30
days. If security has been posted in accordance with this
Section, the animal control agency may draw from the security
the actual costs incurred by the agency in caring for the dog.

5-1-6.12 Upon receipt of a petition, the court must set a hearing on the
petition, to be conducted within 5 business days after the
petition is filed. The petitioner must serve a true copy of the
petition upon the defendant.

5-1-6.13 If the court orders the posting of security, the security must be
posted with the clerk of the court within 5 business days after
the hearing. If the person ordered to post security does not do
so, the dog is forfeited by operation of law and the animal
control agency must dispose of the animal through adoption or
humane euthanization.
