## General Instructions

The portion of unreimbursed costs of the Relevant Hospital Entity attributable to providing, paying for, or subsidizing goods, activities, or services that relieve the burden of government related to health care for low-income individuals. Examples of these activities or services are

- providing emergency, trauma, burn, neonatal, psychiatric, rehabilitation, or other special services;
- providing medical education; and
- conducting medical research or training of health care professionals.

The portion of those unreimbursed costs attributable to benefiting low-income individuals shall be determined using the ratio calculated by adding the Relevant Hospital Entity's costs attributable to charity care, Medicaid, other means-tested government programs, disabled Medicare patients under age 65, and dual-eligible Medicare/Medicaid patients and dividing that total by the Relevant Hospital Entity's total costs. Costs for the numerator and denominator shall be determined by multiplying gross charges by the cost to charge ratio taken from the most recently filed Medicare cost report (CMS 2552-10 Worksheet C, Part 1). In the case of emergency services, the ratio shall be calculated using costs (gross charges by the cost to charge ratio taken from the most recently filed Medicare cost report (CMS 2552-10 Worksheet C, Part 1)) of patients treated in the Relevant Hospital Entity's emergency department.
